

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

369.	Account of the Quantity of Grain, Malt and Flour, exported from <i>Ireland</i> to <i>England</i> and <i>Scotland</i> , from 10th October 1827 to 10th October 1829 - - - - -	21
163.	Account of the Quantity of Corn, Meal and Flour, exported from <i>Ireland</i> to <i>Great Britain</i> , from 5th January 1828 to 5th January 1830 - - - - -	27
101.	Accounts of the Quantity of Foreign Corn, Meal and Flour, imported; and of the Quantity of Grain imported from <i>Ireland</i> into <i>Great Britain</i> ; for the Year ending 5th January 1830 - - - - -	29
102.	Account of the Quantity of Foreign Corn, Grain, Meal and Flour, imported into <i>Great Britain</i> and <i>Ireland</i> , in Foreign and <i>British</i> Ships, from the year 1827 inclusive - - - - -	31
315.	Account of the Quantity of Foreign Wheat, Barley, Rye, Peas, Beans, Oats and other Grain, and Wheat-flour and Meal, admitted into Consumption in <i>Great Britain</i> , agreeable to the Act 9 Geo. IV. c. 60 - - - - -	35
a.51.	Proposed Resolutions respecting the Importation of Corn, by Lord <i>Milton</i> - - - - -	47
275.	Returns of all Accounts that have been received at the Foreign Office from His Majesty's Consuls abroad, relative to the Prices of Foreign Corn, during the year 1829 - - - - -	51
299.	Account of the Amount of Revenue received on the Importation of Foreign Corn and Meal, in each of the Years since 1815 - - - - -	151
470.	Account, distinguishing the Amount of Duty levied upon Corn imported from Foreign Countries from that levied upon Corn imported from <i>British</i> Possessions out of <i>Europe</i> , from 28th February 1829 to 28th February 1830, inclusive; and a similar Account, from July 1828 to 28th February 1829 - - - - -	155

### Beer and Brewers :

190.	Five Accounts; viz. 1. Of the Total Number of Barrels of Beer exported in the Year ended 5th January 1830;—2. Of the Quantity made in each Year from 1825 to 1830, with the Rates of Duty per Barrel, and Total Amount thereof;—3. Of the Number of Barrels of Strong Beer exported, for the same Period;—4. Of the Number of Barrels of Strong, Table, and Intermediate Beer, brewed in <i>England</i> , <i>Scotland</i> and <i>Wales</i> , from 5th January 1829 to 5th January 1830;—and, 5. Of the Number of Brewers, Retail Brewers, Licensed Victuallers, and Intermediate Brewers, in <i>England</i> , <i>Scotland</i> and <i>Wales</i> ; setting forth the Number of Licensed Victuallers who brew their own Beer, for a like Period - - - - -	161
579.	Accounts of the Amount of the King's hereditary Duties of Exoise on Beer and Cyder, in <i>England</i> and <i>Scotland</i> , from 5th January 1820 to 5th January 1830. - - - - -	169

No.	Beer and Brewers— <i>continued.</i>	MS. page.
208.	Account of the Number of Brewers, Retail Brewers, Licensed Victuallers, and Intermediate Brewers, in <i>England, Scotland</i> and <i>Wales</i> , from 5th January 1828 to 5th January 1829 - - - - -	171
	Malt:	
187.	Accounts of the Number of Bushels of Malt charged with Duty in the United Kingdom, and the Amount of Duty thereon, from 5th January 1825 to 5th January 1830; distinguishing the Quantity used by Brewers and Victuallers, and the Quantity used in the Distillery; also, the Number of Bushels of Malt made, and the Amount of Duties paid, in each Collection of Excise, upon the same, in the United Kingdom, from 5th January 1829 to 5th January 1830 - - - - -	175
223.	Account of the Number of Quarters of Malt charged with Duty, the Amount of the said Duty, the Rate per Quarter in each Year; also, the Number of Quarters of Malt used by Brewers and Victuallers; the Number of Barrels of Strong, Intermediate, and Table Beer, separately; the Amount of Duty on Beer, and the Rate of Duty per Barrel, for each sort of Beer, in each Year, from 5th January 1821 to 5th January 1830; stated throughout in the Imperial measure - - - - -	179
	Spirits:	
186.	Accounts of the Number of Wine Gallons of Proof Spirits that paid Duty in each Kingdom for Home Consumption, from 10th October 1823 to 5th January 1830; also, the Number of Imperial Gallons distilled, and exported to and from each Kingdom, with the Rate and Amount of Duty, from 5th January 1829 to 5th January 1830 - - - - -	183
211.	Account of the Quantity of Spirits, the Manufacture of the United Kingdom, that paid Duty, and the Amount thereof, for Home Consumption, in each Kingdom; also, the Quantity of Foreign Spirits that paid Duty, and the Amount thereof, from 5th January 1825 to 5th January 1830 - - - - -	187
188.	Accounts of the Number of Wine and Imperial Gallons of Proof Spirits Malt-Drawback was paid on, under the Acts 1 & 2 Geo. 4, c. 82; 4 Geo. 4, c. 94, and 6 Geo. 4, c. 58, and Rate and Amount thereof in each Kingdom - - - - -	191
224.	Account of the Number of Gallons of Spirits charged with duty in <i>England, Scotland</i> and <i>Ireland</i> , separately; the Rate of Duty per Gallon, and the Total Amount of the Duty; also, the Number of Gallons of Spirits imported into <i>England</i> from <i>Scotland</i> and <i>Ireland</i> , separately, in each year, from 5th January 1821 to 5th January 1830; stated throughout in the Imperial measure - - - - -	195
469.	Account of the Quantity of Corn Spirits annually consumed in the United Kingdom, from January 1800 to 5th April 1830, with the Rate of Duty payable thereon - - - - -	199
366.	Accounts of the Quantity of Corn Spirits and of Rum, at Proof, that paid Duty for Consumption in <i>England</i> , in the four years ending 5th January 1826, and the four years ending 5th January 1830; showing the Averages for those periods, and the Increase or Decrease between the years 1829 and 1830 - - - - -	201
297.	Returns of Spirits in the possession of the Distillers in <i>England, Ireland</i> and <i>Scotland</i> , on the 15th March 1830 - - - - -	205
606.	Accounts of the Quantity of Spirits exported from <i>Ireland</i> and <i>Scotland</i> to <i>England</i> , between 15th March and 15th May 1830, and imported into <i>England</i> from the same places, entered after 15th March 1830; with the additional Duty demanded and received thereon - - - - -	211
531.	Account of the Number of Proof Gallons of Spirits of the Distillation of the Islands of Guernsey and Jersey, imported into <i>England</i> from 5th January 1826 to 5th January 1830; the Rate and Amount of Duty paid thereon, and under what Act levied - - - - -	213
	Spirits, Scotland:	
232.	Returns relating to the Importation of <i>Scottish</i> Spirits into <i>England</i> by Land, and Amount of Duty collected thereon, from 5th January 1828 to 5th January 1830;—Number of Excise Officers employed in the Prevention of Smuggling from <i>Scotland</i> into <i>England</i> , in the same period;— <i>Scottish</i> Spirits seized in the Counties of <i>Cumberland</i> and <i>Northumberland</i> , in the same period;—Quantities of <i>English, Scottish</i> and <i>Irish</i> Spirits respectively, on which Duties of Excise were levied between 5th January 1829 and 5th January 1830 - - - - -	215

No.	Spirits, Ireland :	MS. paging.
613.	Copies of all Letters or Orders from the Treasury or Board of Excise, directing any demand to be made of additional Duties on Spirits on or after the 15th March, which Duties had not been previously authorized by law ; also, Copies of all Letters from Officers of Excise to any Trader, demanding any additional Duty on Spirits sent into Consumption on or after the 15th March - - - - -	221
	Distillers :	
370.	Copies of Memorials addressed to the Treasury by Corn Distillers in <i>England, Scotland and Ireland</i> ; together with Reports of the Commissioners of Excise thereupon - - - - -	231
	Rum :	
291.	Accounts of the Quantity of Rum imported and exported into and from <i>Great Britain and Ireland</i> ; and amount of Duties paid thereon, from 5th January 1829 to 5th January 1830 - - - - -	269
648.	Accounts of the Number of Imperial Gallons of Rum and Molasses annually exported from the <i>British West India Colonies</i> to the United States of <i>America</i> , and the <i>British West India Colonies</i> , from January 1812 to 1829 - - - - -	277
375.	Account of the Quantity of Rum annually admitted for Home Consumption into the United Kingdom, from 5th January 1800 to the 5th January 1829, distinguishing <i>England, Ireland and Scotland</i> , with the Rate of Duty payable thereon - - - - -	279
454.	Account of Imperial Proof Gallons of Rum in bond in <i>England</i> on 5th January 1826 ; of Rum imported and exported, and of Rum in bond on 5th January 1830 - - - - -	281
304.	Return of the Quantity of Rum consumed in <i>Scotland and Ireland</i> during the last five years, and the Quantity consumed in the five years preceding the Reduction of the Duty on <i>British Spirits</i> to two shillings and sixpence per Gallon, in those Countries - - - - -	283
79.	Account of the Total Quantities of Rum sold, or contracted for, to the Commissioners of Victualling, from 5th June 1820 to 5th January 1830, inclusive - - - - -	285
	Wine :	
271.	Account of the Number of Gallons of Foreign Wine upon which the Duty has been paid for Home Consumption, and the Rate of Duty per Gallon, stated in the Imperial Measure, in each year, from 5th January 1821 to 5th January 1830 - - - - -	289

## CORN AVERAGES.

## — 9. —

AN ACCOUNT of the total quantity of MALT and BARLEY arrived in the Port of London in the period of 1806 to 1813, both inclusive; distinguishing British from Foreign, the quantities of each in each Year, the prices of each Year, and the total quantity of the whole period, and the total Average Price of the whole period.

That portion of the Account required by the above recited Order of The Honourable House of Commons, which relates to the importations of Malt and Barley into the Port of London in the period between 1806 and 1813 cannot be furnished, the records exhibiting the information having been destroyed by the fire at the Custom House in 1814. The particulars relating to the average prices for the period in question are shown, conformably to the Order, in the Statement subjoined.

STATEMENT, showing the Average Prices of Barley in each Year from 1806 to 1813, both inclusive; and the Average Price for the whole period.

YEARS.						AVERAGE	
						s.	d.
1806	-	-	-	-	-	37	6 per quarter.

# RESOLUTIONS

## TO BE PROPOSED

### ON THE CORN TRADE,

#### BY LORD VISCOUNT MILTON.

1.—THAT it appears from Papers \* laid before this House, that the Average Prices of Wheat, as fixed in pursuance of the 9 Geo. IV. c. 60. from July 17, 1828, to February 26, 1829, both inclusive, present a general Average, during that period, of 67 s. 3·87 d. per quarter.

2.—THAT it further appears from Papers † laid before this House, that the Average ‡ Prices of Wheat, at the respective current rates of exchange, at the following places, from July to December 1828, both inclusive, were, at

					s.	d.	
Riga	-	-	-	-	34	1·66	per Quarter.
Dantzic	-	-	-	-	49	9·33	—
Hamburgh	-	-	-	-	44	0·	—
Corunna	-	-	-	-	40	10·16	—
Leghorn	-	-	-	-	48	8·33	—
Philadelphia	-	-	-	-	39	8·16	—

and that the general Average of the above-mentioned Prices is 42 s. 10·27 d. per quarter.

3.—THAT it further appears, from the same Paper, that the Average Prices of Wheat, at the respective current rates of exchange, at the following places, from July to December 1828, both inclusive, were, at

					s.	d.	
Amsterdam	-	-	-	-	44	3·50	per Quarter.
Rotterdam	-	-	-	-	57	0·50	—
Antwerp	-	-	-	-	47	8·50	—
Havre de Grace	-	-	-	-	55	11·50	—
Marseilles	-	-	-	-	64	9·50	—

and that the general Average of the above-mentioned Prices, is 53 s. 11·50 d. per quarter.

4.—THAT it appears from Papers § laid before this House, that the Average Prices of Wheat, as fixed in pursuance of the 9 Geo. IV. c. 60, from March 5, 1829, to February 25, 1830, both inclusive, present a general Average of 64 s. 2 d. per quarter.

\* *Vide* Account of Foreign Wheat, &c. admitted into consumption in Great Britain, agreeable to 9 Geo. IV. c. 60. Parliamentary Paper, N° 127; printed April 2, 1829.

† *Vide* Consul's Returns for 1828. Parliamentary Paper, N° 139; printed April 7, 1829.

‡ The average prices in the Foreign Ports are deduced from the highest prices quoted by the Consuls in the first week of each month.

§ *Vide* Account of Foreign Wheat, &c. admitted into consumption in Great Britain, agreeable to 9 Geo. IV. c. 60. Parliamentary Paper, No. 315; printed April 27, 1830.

5.—THAT it further appears from Papers\* laid before this House, that the Average Prices of Wheat, at the respective current rates of exchange, at the following places, for the year 1829, were, at

	s.	d.	
Riga - - -	34	0.55	per Quarter
Dantzig - - -	51	4.16	—
Hamburgh - - -	52	6.91	—
Corunna - - -	39	5.25	—
Leghorn - - -	51	0.88	—
New York - - -	45	9.11	—
Baltimore - - -	49	7.11	—

and that the general Average of the above-mentioned Prices is 46 s. 3.13 d. per quarter.

6.—THAT it further appears from the same Papers, that the Average Prices of Wheat, at the respective current rates of exchange, at the following places, for the year 1829, were, at

	s.	d.	
Rotterdam - - -	59	0.66	per Quarter
Antwerp - - -	56	5.66	—
Havre de Grace - - -	59	7.33	—
Marseilles - - -	64	9.58	—

and that the general Average of the above-mentioned Prices is 59 s. 11.80 d. per quarter.

7.—THAT it appears from Papers† laid before this House, that the total quantity of Foreign Wheat entered for home consumption, and charged with duty, from July 17, 1828, to February 26, 1829, both inclusive, was 1,166,630 quarters, and that the total duty levied thereon was £.87,261. 1s. 9d., being at the rate of 1s. 5.95 d. per quarter.

8.—THAT it further appears from the same Paper, that the Average of the rates of duty charged, in pursuance of the 9 Geo. IV. c. 60, in the weeks following the notification of the Average Prices of Wheat during the same period, is 14s. 0.72d. per quarter.

9.—THAT it appears from Papers‡ laid before this House, that the total quantity of Foreign Wheat entered for home consumption, and charged with duty, from March 5, 1829, to February 25, 1830, was 900,543 quarters, and that the total duty levied thereon was £.568,720. 18s. 9d., being at the rate of 12s. 7.56d. per quarter.

10.—THAT it further appears from the same Papers, that the Average of the rates of duty charged, in pursuance of the 9 Geo. IV. c. 60, in the weeks following the notification of the Average Prices of Wheat during the same period, is 21s. 0.23d. per quarter.

\* *Vide* Consuls Returns for 1829. Parliamentary Paper, N° 275; printed April 8, 1830.

† *Vide* Account of Foreign Wheat, &c. Parliamentary Paper, N° 127; printed April 2, 1829.

‡ *Vide* Account of Foreign Wheat, &c. Parliamentary Paper, N° 315; printed April 27, 1830.

11.—THAT it further appears, that the Average Price of Wheat, as fixed July 31, 1828, was 56 *s.* per quarter; that the same Average, as fixed Feb. 11, 1829, was 75 *s.* 11 *d.* per quarter; being a rise of 19 *s.* 11 *d.* per quarter in twenty-eight weeks; and that the same Average, as fixed February 4, 1830, was 56 *s.* 1 *d.* being a fall of 19 *s.* 10 *d.* per quarter in fifty-one weeks.

12.—THAT, therefore, it appears to this House, that the existing regulations for the Trade in Corn, do not prevent those fluctuations in its price, which are alike injurious to the cultivators of the soil, and to the consumers of Agricultural Produce.

13.—THAT the said regulations obstruct the commercial intercourse between Great Britain and Foreign Countries, that they enhance the price of provisions in this country, increase the cost of production of all the manufactures of the United Kingdom, including Corn itself, render the industry of this nation less capable of competing with that of other nations, and aggravate the distresses of the People.

---

RESOLUTIONS  
TO BE PROPOSED  
ON THE CORN TRADE,  
*By Lord Viscount Milton.*

The above are the "average prices" for the quarter.									1st Quarter. Stock of Wheat and Oats very trifling.
									2d Quarter.  Stock on hand: Wheat, almost all sold. Rye, about - 16,000 Barley - - - 11,000 Oats, trifling.  There is every appear- ance of the Wheat crop being less than an average one. Rye is expected to produce a fair crop; and the rain lately fallen will prove very beneficial to the Oats and Barley. The exchange is ex- pected to take a more fa- vourable turn soon.
									Libau, 30th June 1829. Francis Kienitz, Consul.
October.			November.			December.			REMARKS.

6/6-7/7	5/8-6/9	22/6							
The above are the "average prices" for the quarter.									3d Quarter. Our harvest is now nearly finished, having been retarded by uncon- mon rainy weather. The quality of Wheat proves very good; not above the half of an average crop has, however, been earned. Rye is an average crop, and of excellent quality. Barley varies; and the Oat crop is anticipated to be an indifferent one.
									4th Quarter.  Stock on hand: Wheat, about 600 Qrs. Rye - - 20,000 d° Barley - - 30,000 d° Oats - - 1,000 d°  Total - 51,600 d°  Exchange. The Exchange conti- nues fluctuating at 600 silver copecks, a trifle more or less.
									Libau, 31st Dec. 1829. Francis Kienitz, Consul.

s. d. s. d.	293 1/2 sil. gr. p' £. sterling.	£. sterl.	s. d.	203 1/2 do. per do.	£. sterl.	s. d.	Exchange at par.	£. sterl.	1st Quarter. Stock in hand. Nil.  2d Quarter. No stock in hand, nor in store. More Wheat has been sown in this part of the country than usual; and notwithstanding the severity of the winter, the country wears a most promising aspect. The prices have fallen very much in the interior; and they fall or rise, very much in proportion as the Import Duty, in England, increases or decreases.  Memel, 30th June 1829. Fred. Chatfield, Consul.

In other Grain there is little doing.</p>

2d Quarter.			
Considerable shipments of Wheat have taken place from hence during this quarter; but the supplies which came down from all parts of the interior being equal to the demand, prices have declined, though large purchases have been made for exportation.			
Stock on hand:			
Wheat	-	about 38,000 qrs.	
Rye	-	19,000	
Barley	-	16,000	
Oats	-	5,500	
Total	-	78,500	
Quantities shipped to England during this half-year were as follows:—			
Wheat	-	about 108,000 qrs.	
Rye	-	400	
Barley	-	700	
Oats	-	500	
Total	-	104,600	
Freights: To London, 2/6; to Hull, 2/; and to Liverpool from 3/ to 3/6 per quarter.			
Hamburg, 30 June 1829.			
H. Canning, Consul.			
3d Quarter.			
On the whole, it appears that the crops of Wheat and Rye have yielded somewhat more than an average quantity, but the quality varies. Barley and Oats have suffered, and are middling both in quantity and quality.			
4th Quarter.			
Little variation will be found in the prices of Grain at Hambro' during this quarter; and for nearly half the period little business has been done, owing to the stoppage of the navigation of the Elbe by the frost.			

The Exportations of Grain from Hambro', during the year 1829, are computed at the following Quantities:			Of which the following Quantities were exported to Great Britain:			Stock on Hand: { Wheat, 30,000 - Rye, 25,000 Barley & Oats nothing material.	
Wheat - 247,000	Barley 22,100	TOTAL. 307,400 qrs.	Wheat - 154,000	Barley - 10,800	TOTAL. 170,600 qrs.	Freights, previous to the closing of the Navigation, about 1/6 per qrs.	
Rye - 30,600	Oats - 7,700		Rye - 4,300	Oats - 1,600		Henry Canning, Conl Genl.	
Hambro', 31st December 1829.

From the reduction of prices in the English market, and the consequent increase of duty on importations, a corresponding diminution has taken place here in prices. A much larger portion of land has also been brought into cultivation this year from the prospect of the ports remaining open in England. It appears, by accounts from the various sections of this state, as well as from the interior of the country in general, that there is every prospect of an abundant harvest.

WILLIAM IRVING,  
Inspector General of Imports and Exports.

C O R N.

---

AN ACCOUNT, distinguishing the Amount of  
Duty levied upon CORN imported from Foreign  
Countries from that levied upon CORN imported  
from British Possessions out of Europe, from  
28th February 1829 to 28th February 1830,  
inclusive: and a similar Account from July  
1828 to 28th February 1829.

---

*Ordered, by The House of Commons, to be Printed,*  
*28 May 1830.*

---

BEER AND BREWERS.

---

A C C O U N T S :

— 1. —

Of the Total Number of BARRELS of BEER exported in the Year ended 5th January 1830 ;—

— 2. —

Of the Quantity made in each Year, from 5th January 1825 to 5th January 1830, with the Rates of Duty per Barrel, and total Amount thereof ;—

— 3. —

Of the Number of Barrels of STRONG BEER exported ; from 5th January 1825 to 5th January 1830 ;—

— 4. —

Of the Number of Barrels of STRONG, TABLE and INTERMEDIATE BEER, brewed in *England, Scotland and Wales* ; from 5th January 1829 to 5th January 1830 ;—and,

— 5. —

Of the Number of BREWERS, RETAIL BREWERS, LICENSED VICTUALLERS, and INTERMEDIATE BREWERS in *England, Scotland and Wales* ; setting forth the Number of Licensed Victuallers who brew their own Beer ; from 5th January 1829 to 5th January 1830.

---

*Ordered, by The House of Commons, to be Printed,  
25 March 1830.*

---

— 1. —

AN ACCOUNT of the Total Number of BARRELS of BEER exported from *England* and *Scotland* to *Ireland*, and from *Ireland* to *England* and *Scotland*; distinguishing the Number of Barrels so Exported to each Kingdom, as likewise the Number of Barrels exported from each Kingdom to Foreign Countries, with the Amount of Drawback paid thereon; from 5th January 1829 to 5th January 1830.

SPIRIT DUTIES, IRELAND.

—1.—

COPIES of all LETTERS or ORDERS from The TREASURY, or BOARD of EXCISE, directing any demand to be made of any additional DUTIES on SPIRITS, on or after the 15th day of March last, which additional Duties had not been previously authorized by law.

To the Commissioners of Excise, &c. &c. &c.

GENTLEMEN,

Treasury Chambers, 17th March 1830.

THE House of Commons having, on the 17th instant, Resolved,—

“THAT from the 15th day of March 1830, there shall be raised, levied and collected and paid, for and upon every gallon of Spirits which shall be distilled in England, or which shall on or after that day be found in the stock or possession of any distiller in England, or which shall be brought from Scotland or Ireland into England, an additional Duty of One Shilling :

“THAT from and after the 15th day of March 1830, there shall be levied, raised, paid and collected, upon every gallon of Spirits which shall be distilled in Scotland or Ireland, or shall on or after that day be found in the stock or possession of any distiller, or which shall be taken out of warehouse for consumption in Scotland or Ireland respectively, an additional Duty of Twopence.”

I am commanded, therefore, by the Lords Commissioners of His Majesty's Treasury to desire that you will forthwith take the necessary measures for ascertaining the stock of Spirits in the hands of distillers in England, Ireland and Scotland, in order that the additional Duties directed to be levied by the said Resolutions may be charged thereon.

I am, Gentlemen,

Your obedient servant,

(signed) *Geo. R. Dawson.*General LETTER.—To the several Collectors.

SIR,

BY order of the Board, I send you the following Extract from the Resolutions of The House of Commons of the 15th March 1830.

I am, Sir,

Excise Office, London,  
17th March 1830.

Your humble servant,

(signed) *John Brown.*

“That from the 15th day of March 1830, there shall be raised, levied and collected and paid, for and upon every gallon of Spirits which shall be distilled in England, or which shall on or after that day be found in the stock or possession of any distiller in England, or which shall be brought from Scotland or Ireland into England, an additional Duty of One Shilling.”

LETTER from Collector of Excise at Liverpool to Collector of Excise  
at Manchester.

SIR,

BE pleased to call on Mr. Thomas Gill, spirit merchant, Manchester, and acquaint him that one shilling per gallon more is due from him for Duty on the 121½ gallons of British Spirits imported into Liverpool in the "James Watt" on the 17th instant. You will have the goodness to request him to give directions to his agent here to pay the amount at this office immediately.

I am, Sir,

Your humble servant,

Excise Office, Liverpool,  
20th March 1830.

(signed) *J. Simpson,*  
Collector.

General LETTER.—To the several Collectors.

SIR,

THE Commissioners order that you transmit, with the least possible delay, a return of all Spirits in the possession of the distillers in your collection on the 15th March instant; also, a similar return of all Spirits in the possession of the rectifying distillers on the said 15th of March.

I am, Sir,

Your humble servant,

Excise Office, London,  
23d March 1830.

(signed) *John Brown.*

General LETTER.—To the several Collectors in Scotland.

SIR,

BY order of the Board, I send you the following Extract from the Resolutions of The House of Commons, passed on the 15th of March 1830; viz.

"That from the 15th day of March 1830, there shall be raised, levied and collected and paid, for and upon every gallon of Spirits which shall be distilled in England, or which shall on or after that day be found in the stock or possession of any distiller in England, or which shall be brought from Scotland or Ireland into England, an additional Duty of One Shilling."

It is also further ordered, if the distillers in your collection offer to pay the additional Duty, that you take the same, and account for it accordingly.

I am, Sir,

Your humble servant,

Excise Office, London,  
12th April 1830.

(signed) *J. Norman.*

General LETTER.—To the several Collectors of Excise in Ireland.

Excise Office, London, 12th April 1830.

BY order of the Board, I send you the following Extract from the Resolutions of The House of Commons, passed the 15th March 1830:

“ That from the 15th day of March. 1830, there shall be raised, levied and collected and paid, for and upon every gallon of Spirits which shall be distilled in England, or which shall on or after that day be found in the stock or possession of any distiller in England, or which shall be brought from Scotland or Ireland into England, an additional Duty of One Shilling;” and that the Duty must be taken accordingly. And “ That from and after the 15th day of March 1830, there shall be raised, levied, paid and collected, upon every gallon of spirits which shall be distilled in Scotland or Ireland, or shall on or after that day be found in the stock or possession of any distiller, or which shall be taken out of warehouse for consumption in Scotland or Ireland respectively, an additional Duty of Twopence;” which Duty must be taken accordingly.

I am, Sir,

Your humble servant,

(signed) *James Clements.*

—2.—

COPIES of all LETTERS addressed by any OFFICER of EXCISE to any TRADER, demanding additional DUTY on SPIRITS sent into Consumption on or after the 15th day of March 1830.

To Mr. *John Murray*, Distiller, Marlfield.

SIR,

Clonmel, 18th April 1830.

I HAVE received an order from the Honourable Commissioners of Excise, London, containing an Extract from a Resolution of The House of Commons, directing, that from and after the 15th March last, an additional duty of Twopence per gallon should be levied on Spirits for home consumption in Ireland; which Duty I have been directed to receive accordingly.

I am, Sir,

Your humble servant,

*William Miller*, Collector.

To Mr. *John Nightingale*, Collector of Excise, Bristol, on Thursday,  
22d April 1830.

THE Commissioners direct me to acquaint you, that the additional Duty of one shilling per gallon attaches on the eight puncheons of Scotch Spirits imported at Bristol, as stated in your letter of the 18th ultimo.

(signed) *John Brown.*

To the Collector of Excise, Limerick, Ireland.

SIR,

Excise Office, London, 27th April 1830.

Mr. JAMES MORGAN of Limerick, spirit dealer and retailer, having applied to the Board respecting the additional Duty on spirits demanded by you on his stock in bond,—

The Commissioners transmit you herewith a copy of his memorial, and direct you to report your observations on the allegations contained therein.

I am, Sir,

Your humble servant,

(signed) *James Clements.*

To Mr. John Nightingale, Collector of Excise, Bristol, on Friday,  
the 30th April 1830.

THE Commissioners have directed me to communicate to you the following copy of a report of W. K. Dehany, in answer to your letter of the 24th instant, requesting to be informed whether the additional Duty of one shilling per gallon is to be required of Messrs. Castle & Co. of Bristol, on the spirit distilled by them since the 15th ultimo, and it is the pleasure of the Board that you act agreeably thereto in the business.

“ Although the Duty is charged, the payment cannot be enforced until the Resolution is made good by law. The distiller should be informed that the additional Duty will be considered a charge against him, to be paid immediately on the Bill passing.

(signed) *John Brown.*

To the Collector of Excise, Cork.

SIR,

Excise Office, London, 3 May 1830.

IN reference to your report of the 16th ultimo, stating that Messrs. Callaghan & Co. refuse to pay the Duty of three shillings per gallon on a quantity of Spirits which they wish to take out of warehouse,—

The Commissioners direct that notwithstanding the notice served on you, that you insist on the Duty; and inform Mr. Callaghan, that under the Act he will be authorized to recover the additional Duty from the purchaser.

I am, Sir,

Your humble servant,

(signed) *James Clements.*

To D. Callaghan, Esquire, Distiller, Cork.

SIR,

Cork, May 6th, 1830.

BY letter from the Honourable Commissioners of Excise, dated the 3d instant, I am directed to insist on the Duty on Spirits at the rate of Three Shillings per gallon; which rate you will be authorized to recover from your purchasers.

I am, Sir,

Your obedient servant,

(signed) *William N. Plant,*  
Collector.

To the Collector of Excise, Wexford.

SIR,

Excise Office, London, 6 May 1830.

WITH reference to your report of the first instant, respecting Messrs. Harvey & Jameson, distillers, in your collection, who have refused to pay the additional Duty of Twopence per gallon on their Spirits,—

The Commissioners transmit you herewith a copy of the Solicitor's Opinion on a similar case in Cork collection.

I am, Sir,

Your humble servant,

(signed) *James Clements.*

(Copy referred to.)

NOTWITHSTANDING this notice, I submit that the Duty be insisted on; Mr. Callaghan may be informed, that under the Act he will be authorized to recover the additional Duty from the purchaser.

24th April 1830.

*W. Dehany.*

---

To the Collector of Excise, Galway.

SIR,

Excise Office, London, 8th May 1830.

WITH reference to your report of the 16th ultimo, respecting the additional Duty of two-pence per gallon on Spirits,—

The Commissioners inform you, that the Duty is to be charged on stock in hand and in warehouse, in conformity with the Resolutions.

I am, Sir,

Your humble servant,

(signed) *James Clements.*

---

To the Collector of Excise, Limerick.

SIR,

Excise Office, London, 10th May 1830.

REFERRING to your report of the 3d instant, respecting the additional Duty on Spirits, demanded by you from Mr. James Morgan, of Limerick, spirit dealer,—

The Commissioners order you to communicate to him the annexed copy of the Solicitor's Report, dated, 24th ultimo, on a similar case in Cork collection.

I am, Sir,

Your humble servant,

(signed) *James Clements.*

(Copy referred to.)

NOTWITHSTANDING this notice, I submit that the Duty be insisted on. Mr. Callaghan may be informed, that under the Act he will be authorized to recover the additional Duty from the purchaser.

24th April 1830.

(signed) *W. Dehany.*

To the Collector of Excise, Cork.

SIR,

Excise Office, London, 20th May 1830.

NOTWITHSTANDING the order which was sent to you on the 3d instant,—

The Commissioners direct, that until further orders you do not object to the delivery of Spirits upon payment of the Duty as hitherto, if the parties refuse to pay the additional Duty intended to be imposed thereon.

I am, Sir,

Your humble servant,

(signed) *James Clements.*

Similar Letters to the Collectors of Galway, Limerick, Wexford and Clonmel.

General LETTER.—To all the Collectors in England.

SIR,

I AM directed by the Commissioners to acquaint you, that the additional Duty on Scotch and Irish Spirits brought into England on and after the 15th March last, must not be enforced until the Resolution of The House of Commons in that respect shall have passed into law.

The parties, however, will be held liable for the amount.

## DISTILLERS.

COPIES of MEMORIALS addressed to the Treasury by CORN  
DISTILLERS in *England, Scotland and Ireland*; together with  
Reports of the Commissioners of Excise thereupon.

TO THE RIGHT HONOURABLE THE LORDS COMMISSIONERS OF  
HIS MAJESTY'S TREASURY.

The Petition of the undersigned Distillers in Scotland ;—

Humbly Showeth,

THAT by the Act Geo. IV. c. 94. s. 26, it is provided that the end of every still worm, in every distillery be enclosed in such manner as the Commissioners of Excise shall direct. This clause of the Act has hitherto been neglected, and not put in force. It must be obvious to your Lordships, that so long as the distiller has it in his power to convey away spirits from the worm end without payment of duty, that the revenue is but imperfectly secured. In the same Act, no doubt, it is provided, that if inclosing the worm end be found prejudicial to the quality of the spirits, your Lordships might discontinue it; but as there are various modes of inclosing the worm end now in use, which are found not to injure the quality of the spirits, this objection no longer exists. As it would materially conduce to the protection of the revenue and fair trade, your Petitioners trust, your Lordships will not allow so decided an opening for fraud to be continued, especially when it is contrary to the spirit of the Act of Parliament.

Your Petitioners also humbly beg leave to represent to your Lordships, that another and most material check to fraud in distilleries would be given if a more frequent change of Excise officers could be carried into effect, by which much collusion between the distiller and the officers might be prevented.

May it therefore please your Lordships, to take the premises into consideration, and to appoint that the Act of Geo. IV. c. 94. s. 26. be duly enforced, and that a more frequent change of the Excise officers from distilleries be ordered, to the effect that the revenue and fair trader be fully protected against every fraud.

And your Petitioners will ever pray, according to justice, &c.

John Stein & Co.  
Robert Stein & Co.  
George A. Haig.  
Thomas Haig.  
James Haig & Son.  
Robt Haig & Co.

66, Mark Lane, London,  
6th February 1828.

## COPIES OF MEMORIALS TO THE TREASURY BY

TO THE RIGHT HONOURABLE THE LORDS COMMISSIONERS OF  
HIS MAJESTY'S TREASURY.

The humble Memorial of the undersigned, now in London, Partners of Companies, Distillers in Scotland, for themselves and in behalf of their respective Companies;

Showeth

THAT by the 6 Geo. IV. c. 58, an allowance equal to 1s. 2d. per gallon of spirits is granted distillers in Scotland and Ireland, during the time that such distillers use malt only.

That the means provided by that Act having been found ineffectual to protect the revenue against the evasions which were rendered practicable by such allowance, a further provision was made on this behalf by the 7 & 8 Geo. IV. c. 52. and 74 & 75;

Which your Memorialists are firmly persuaded, that neither the provisions already made, nor perhaps, any provisions that can be made, will be sufficient to protect the revenue or to prevent those distillers who use malt only from deriving advantages by means of this allowance at the expense of the revenue, and to the prejudice of distillers who use raw grain with a mixture of malt.

Your Memorialists, therefore, humbly pray, That the above allowance may be discontinued.

And your Memorialists will ever pray.

*James Aitchison*, partner of *Wm. & James Aitchison*, Distillers,  
St. Clement's Wells, East Lothian.

*Geo. Dunlop*, partner of *George Dunlop & Co.* Distillers,  
in the county of Haddington.

*Robert Haig*, partner of *Haig, Brothers & Co.* Distillers,  
at Leith and Inverkeithing.

This Memorial would have been also signed by David Haig, Esq. as a partner of Messrs. James Haig & Sons, distillers at Lochvin and at Sunbury, both in the county of Edinburgh, and who are the largest in Scotland, had he not been obliged to go out of town early this morning before it was wrote out, as the note attached to this will shew.

*George Dunlop.*

17th March 1828.

MY DEAR SIR,

Sunday Evening.

I AM sorry I happened to be out when you called on me, and as I set off to-morrow morning at seven o'clock, it will not be in my power to see you. I expected from the conversation we had yesterday, that you would have sent the petition you wished me to sign last night or this day.

Yours, &c.

To George Dunlop, Esq.

*David Haig,*  
New Hummums, Covent Garden.

SIR,

REFERRING to the conversation we had about the drawback on malt spirits under 4 Geo. IV. c. 94. and 6 Geo. IV. c. 58. in Scotland, at the interview you honoured us with respecting the wreck of our spirits by Queen Charlotte, we now enclose you a memorial, praying that the drawback may be done away with during the four years it existed prior to last Malt Act, 7 & 8 Geo. IV. c. 52. certificates for the duty being paid on malt was quite currently bought from the brewers at about 4s. per quarter, which enabled the distiller getting them to use grain and then to drawback, from 10th October 1823 to 5th January 1826, at the rate of 16s. for the quarter of grain, and after that date (5th January 1826), by 6 Geo. IV. c. 58, at the rate of 18s. 8d. the revenue suffering just this actual loss; we suppose there may have been paid for this drawback since 10th October 1823, from £.1,000,000. to £.1,200,000. for no good purpose we can see, and we would not be surprised that the half of this sum may have been got back this way by buying these certificates just, as said before actual loss to the revenue. The last Malt Act 7 & 8 Geo. IV. c. 52. to be sure does away those certificates, but still we do not consider it  
secures

secures against advantage being taken of that drawback, nor do we consider it possible to make any law to do so, and this is not our opinion now, but what we most decidedly stated to the Commissioners of Revenue Inquiry and others, during the discussion that took place when that Act 4 Geo. IV. c. 94, was passing; by it, and which continued to be the law till 10th October last, when the new Malt Act 7 & 8 Geo. IV. c. 52 took effect, the duty on the malt was obliged to be paid before it could be lodged in the distillery; but by this last Act, 7 & 8 Geo. IV. c. 52, it can be lodged without the duty being paid and the drawback on the spirits got so soon as they are made, thus putting the revenue in advance, which, we would not wonder, might in Scotland, about 20th or 23d February last, be to the extent of 30,000*l.* which is just furnishing a capital to the distillers, both at the expense and risk of the revenue; and if you will move or sanction the inclosed order to be moved for in the House, it will show the extent of it.

You asked me if we suffered any inconvenience, or had any complaint in the landing of our spirits here. We have great pleasure in repeating our verbal answer, that we suffered none; and instead of any complaint, we meet with every accommodation from the officers of Excise and Customs. With every apology for the length of this, we have the honour to be with great respect,

Sir,

Your most obedient and humble servants,

G. R. Dawson, Esq.  
&c. &c. &c.

George Dunlop.  
James Aitchison.

TO THE RIGHT HONOURABLE AND HONOURABLE THE LORDS  
COMMISSIONERS OF HIS MAJESTY'S TREASURY.

The Petition of the Rectifying Distillers of Ireland;—

Humbly sheweth,

THAT Your Petitioners have been for many years engaged in trade as rectifying distillers, in which they have invested capital to the amount of at least £.200,000, the greater part of which cannot be made productive of profit except in the trade in which it is so invested :

That in the month of July last, your Petitioners learned with surprise, that without any previous notice to them, a Bill was introduced into Parliament on or about the 24th day of June last, and subsequently passed into a law, whereby it was enacted, that after the 10th October 1828, the several enactments, regulations, provisions, penalties and forfeitures contained in a certain Act, passed in the sixth year of the reign of His present Majesty, in relation to the rectification and compounding of spirits in England, should extend and be applied to Ireland :

That amongst other regulations contained in the said Act, is one whereby rectifiers of spirits are prohibited from sending out any rectified spirits exceeding the strength of seventeen per centum *under* hydrometer proof.

That at the time when your Petitioners embarked their property in their trade, and from thence until the time hereinafter mentioned, they were not subject to any restrictions in relation to the strength of the spirits which they manufactured, and therefore the spirits which your Petitioners manufactured and sent into consumption were almost invariably of a strength exceeding seventeen per centum *over* proof :

That as your Petitioners would not be able to find a home market for any spirits of the strength mentioned in the aforesaid Act, as such a commodity never was in use in Ireland, and as by the existing laws spirits rectified in Ireland are excluded from the English market, and therefore as the immediate and inevitable consequences of the enforcement of the provisions of the aforesaid Act must have been the total ruin, not only of your Petitioners' trade, but of almost all the property which they have invested in it, your Petitioners, in the month of August last, presented a petition to your Lordships, praying that you would be graciously pleased to order that the provisions of the aforesaid Act should not be put in operation against them :

That the said petition having been referred to the Board of Commissioners of

Excise in Ireland, and it having been, on a special inquiry directed by them, ascertained by their solicitor and two surveying general examiners, that the said law was enacted without any regard being had to the interests of your Petitioners, or to the pre-existing laws in Ireland, your Petitioners received an assurance not only that the provisions of the aforesaid Act would not be put in operation against them, but that the repeal thereof would be sought for at the instance of the Commissioners of Excise :

That your Petitioners were permitted to carry on their trade as they had been accustomed to do until the 21st of March instant, when, without any previous intimation to your Petitioners, their trade was suddenly stopped altogether by an order issued by the Commissioners of Excise prohibiting the granting of permits to your Petitioners for any spirits over hydrometer proof, although your Petitioners believe that the only object intended was, that the account of your Petitioners stock should be kept in proof gallons; a regulation to which your Petitioners are willing to conform :

That should the said order remain in force, or the provisions of the said Act be put in operation, the consequence will be, the total annihilation of your Petitioners' trade, and the destruction of the property invested in it, without the least additional advantage or security being thereby afforded to the revenues of the Crown, but on the contrary, they will be prejudiced to a considerable extent :

That your Petitioners respectfully, but firmly protest against the arbitrary and wanton attack which has been thus made upon their property, not only without any just grounds, but without any opportunity having been afforded them to defend it :

Your Petitioners, therefore, humbly pray, that your Lordships will be pleased to direct that the aforesaid order of the Board of Excise shall be rescinded, and your Petitioners permitted to carry on their trade as heretofore, or to make such other order for the permanent relief of your Petitioners as to your Lordships shall seem meet.

And your Petitioners will ever pray.

*Denis Moylan,  
Thos. & John Ford.  
Pat. Hayes,  
Thos. Donohon & Co.  
Pat. Keon & Co.*

SIR,

New Hummums, Covent Garden, 1 April 1828.

I SHOULD not wish to be troublesome, but as at the last interview you said we should see the Chancellor of the Exchequer about the malt drawback, I beg to repeat what I then said, that I was ready to wait on him with any information I could. The memorial and letter sent you furnish a good deal, and had that memorial been sent to Scotland, it would have been more numerously signed; for which I refer you to one of last year, to be found at page 498 of volume 17, of the Printed Papers of the House of Commons of last session. Among the names, several are, I believe, mostly entire malt distillers for drawback, one of them of great extent, who has hardly ever wrought any thing but malt since that drawback began, 10th October 1823; viz. William Young & Co., whose workings are frequently to be found in accounts in that volume 17 alluded to. But taking the largest one in page 500 and 501, they will be found to have made up to 5th January 1827, 550,598 gallons of malt spirits, on which they will have drawn back nearly £.30,000, and they, up to the latest conversation I had with them before leaving Scotland, always expressed themselves anxious to have it done away, and I think it is likely you will have memorials from Scotland. The English distillers, I am told, have given in one against it; and from any correspondence I have had with the Irish distillers, I understand they are unanimous to have it done away; indeed I should suppose distillers making three-fourths if not nine-tenths of the whole spirits made in the United Kingdom are for this. If you would move for the account I gave you motion for, for the amount of the drawback paid to 5th instant, I think you will find, perhaps, £.1,200,000. given away, and the former account you moved for, will show how much the revenue is in advance. Mr. Aitchison tells me, that up to now they have only paid about £.200. of malt duty, and making malt for drawback for only about a month, had drawn back about £.1,500: now what must others

others have done, making constantly malt spirits for drawback? and his house joining in wishing to have it done away, shows they do not think it right. On looking over a malt account, N° 158 of this session, more malt is shown used than made both in Ireland and Scotland, while England shows above 4,200,000 bushels unused; and taking a beer account, N° 160, on calculating the malt, it for England is nearly  $2\frac{1}{8}$  bushels to the barrel beer, whereas in Scotland it is only  $1\frac{1}{8}$  bushels, and there, a great deal of ale is made so strong as to be sold for from 4*l.* 4*s.* to 6*l.* 6*s.* per barrel, (the last price I have paid myself,) and this will require above four bushels malt to make the barrel of beer; the thing is easily accounted for, as the brewers would show less malt used than they really did use, and then sold the certificate for the rest to distillers. Indeed the brewers sold them quite openly and admittedly, and were liable to no penalty for so doing,

On the 4th March, Mr. Moore of Dublin moved for some accounts, which when they come will explain this more fully, and I think will, betwixt the 10th October 1828 and 5th January 1828 show a great deal more malt consumed in Scotland than the quantity made. Now it is obvious that some part of the malt made in Scotland must have been consumed in private brewing, of which the Excise neither can nor have a right to have an account of; and it is believed and cannot be denied, that a great deal has been consumed in illicit distillation.

Allow me to add, it is my wish to get away to Scotland after Monday next.

With the greatest regard and respect,

I have the honour to be, Sir,

Your most obedient and very humble servant,

(signed) *Geo. Dunlop.*

G. R. Dawson, Esq. M. P.  
&c. &c. &c.

TO THE RIGHT HONOURABLE THE LORDS COMMISSIONERS OF  
HIS MAJESTY'S TREASURY.

WE the undersigned Distillers of the City of Dublin, respectfully beg leave to state,—

THAT within the last twelve months we have represented, first to the Commissioners of Excise, and next to your Lordships, the inadequacy of the regulations affecting the distilleries of Ireland and Scotland to the collection of the revenue from spirits, and the inefficiency of the survey by which those regulations are intended to be enforced, and the great increase of smuggling among the licensed distillers, consequent upon the general imperfection of the system. We ventured at the same time to recommend certain alterations in the law, and an increased vigilance of survey, as calculated to repress this great and growing evil. As yet the desired alterations in the law have not been made; and although an additional number of officers of rank in the Excise have been put upon distillery duty, yet it has not been found possible to effect any material improvement in the survey, and in most places the fraudulently disposed continue the prosecution of their illegal practices, unrestrained and unpunished. It is true that in several districts the distillers themselves, alarmed at the progress of fraud, assembled in October last, and by a voluntary oath bound themselves to a full payment of the duty for twelve months. An attempt was made to make this obligation general, but it was frustrated by the refusal of several distillers to pledge themselves, even by a resolution not to smuggle. We have no doubt that this oath has been most faithfully kept by those who took it, but we have as little doubt that the parties not restrained by any such obligation, who smuggled last year, are smuggling still.

What we have said, is applicable solely to this country; but we have the best reason to believe, that frauds to a greater extent have been committed in Scotland. Scotch spirits continue to arrive here in quantity, and to be sold at a price less than the cost of production of our spirits, although subject to the charges of transit and factorage. We as practical distillers do not hesitate to assert, that such a trade could not be prosecuted without ruin, if the duties

Referred by Mr.  
Cotton, 22 April  
1828.

were faithfully paid, and that it is at the expense of the revenue that it is carried on.

We trust we shall be pardoned for taking this opportunity of asserting, (and in justice to ourselves we are anxious to do so,) that in this city the existing duties have been paid without fraud or evasion. We trust we shall obtain credit for the solemn declaration, which we severally make, that, though not bound by oath, we have not evaded or attempted to evade the duty, and that the sale and delivery of unpermitted spirits are now unknown between the Dublin distillers and their customers. The truth of this assertion being admitted, it will readily be believed, that with the revenue, our interest has suffered by the frauds practised elsewhere. On more occasions than one have we been forced nearly to suspend our sales, and to suffer the consumption of this city to be supplied by other spirits than ours. But we again solemnly declare, that we have not resorted to fraud, in order to enable us to hold or to recover that share of the trade which we formerly enjoyed, and which within the last three years has been wrested from us. Conceiving that the interest of the fair trader is inseparably connected with that of the revenue, we are most anxious for such improvements in the whole system as, by securing the latter, will avert the ruin with which our business is threatened.

With regard to the survey, we beg to say that in our humble judgment it can only be improved by the constant and active employment of officers of superior rank and experience, practically acquainted with distillery duty, and capable of controlling and directing the subordinate officers. The exertions of such men ought to produce the best effects; but it must be admitted, that where distilleries are numerous and scattered over a great extent of country, as in Ireland and Scotland, it is next to impossible to establish an effectual survey in all situations. The same number of officers who would be sufficient for a large town or a populous district, in which distilleries are thickly planted, could not effectually do duty in a part of the country in which the distilleries are situated at a distance from each other. Neither can equal dependence be placed upon the ability, zeal and integrity of all officers. Apprehending therefore that it may not be possible to establish every where an efficient survey, we are the more anxious for such alterations in the law as may render fraud a matter of greater difficulty than it is at present; and with that view we would most earnestly recommend, as a measure of primary importance, the immediate abolition of low gravities of wash. There is no regulation affording such facility for fraud as that by which the use of low gravities is allowed. It was we believe enacted, under an impression that weak wash produced spirits of superior quality; but no idea could be more erroneous, and experience has demonstrated that it is not by weak wash that the flavour of the spirits is improved. In the belief that nothing will be productive of such security to the revenue as a change in this regulation, we beg to recommend that *sixty* degrees instead of *thirty* be in future the *lowest* gravity of which notice may be given by any distiller. This change we consider of paramount importance to the revenue, and if it could be combined with such improvements in the survey as would produce an accurate account of the quantity of wash brewed, it would go a great way in preventing fraud.

We have already repeatedly urged the repeal of the drawback allowed upon spirits made from malt only; and notwithstanding the extension of one malt law to the three countries, we remain unfavourable to this regulation, believing that it continues to be a great source of fraud. In this country the distiller has had no inducement to take advantage of it. Of a small quantity of malt spirits made in this city last year, nearly the whole remains on hand, it not having been possible to procure a remunerating price for it. In Scotland, however, the trade is still prosecuted to a large extent, and consequently we must infer that the distiller finds an advantage in it. And yet we find that what are called malt spirits are sold cheaper than we can produce them; this we cannot reconcile to a belief that no advantage is obtained beyond what the law intended. One advantage the malt distiller possesses, which it is presumed was not contemplated when the law was framed, in the privilege of removing malt from bond upon giving security for the payment of the duty on a distant day, whereby the malt may be distilled, and the drawback obtained, and the spirits sold, paid for, and (perhaps) consumed, before the duty which has been drawn back can be returned into the Treasury; the distiller having the benefit of it in

n the mean time, and being thus provided in fact by government with capital to carry on his business. The most respectable of the Scotch distillers who are acquainted with the abuses to which this regulation gives rise, are understood to be as desirous of its repeal as we are.

We have been informed that several distillers in this country are desirous that every distiller shall, before obtaining a license, be required to take an oath binding him to the full payment of the duty on his spirits. Although not favourable to oaths in the collection of the revenue, we are nevertheless disposed to concur heartily in this recommendation; and we cannot imagine that any man of fair and honest intentions would object to it. Such an oath taken by each partner engaged in the active management of a distillery would, we are persuaded, be effectually binding on the parties. We respectfully submit that it should be in the most comprehensive form, and that loss of license and the penalty of perjury should attend a proof of its violation.

We shall only take leave further to say, that we are convinced that the measures we have ventured to recommend, namely, the abolition of low gravities of wash, the improvement of the survey, the repeal of the malt drawback, and the imposition of the oath, would place the revenue arising from the distilleries of Ireland and Scotland in a better state of security than it is at present, and would afford protection to the fair trader, such as we are persuaded it is the wish of government he should enjoy. Without an effectual improvement of the system, and an efficient collection of the duty, we can have no hope of an improvement in our trade, and of being able to redeem the large capitals which, since 1823, many of us have found it necessary to expend, in adapting our works to the existing law. And we earnestly implore your Lordships not to let this session pass over without considering this important subject, and adopting the measures which we respectfully suggest.

(signed) *James Jameson,  
John Power,  
And Fifty others.*

Dublin, 16th April 1828;

TO THE RIGHT HONOURABLE THE LORDS COMMISSIONERS OF  
HIS MAJESTY'S TREASURY.

MY LORDS, MAY IT PLEASE YOUR LORDSHIPS,

WE, the subscribers, distillers in the North of Ireland, beg leave most respectfully to address your Lordships, and to solicit your immediate attention to the very loose, imperfect and inefficient system of survey which has been established under the present distillery law, and which so far from securing a full and fair collection of the duties from every person concerned in the trade in Ireland and Scotland, leaves the greatest opportunity for fraud and evasion, to the manifest prejudice of the fair trader, and the great injury of His Majesty's revenue.

This evil state of matters has been more than once before represented to your Lordships' Board, and a more active and strict survey prayed for throughout the United Kingdom, but hitherto without effect; we, therefore, again most earnestly implore your Lordships' attention to this subject, and that you will be pleased to give directions to the Boards of Excise in Ireland and Scotland, to establish a more rigid and active system of survey over the distilleries of these two portions of the United Kingdom, and to place at the disposal of these Boards means suitable for accomplishing this purpose, the present being quite ineffectual.

And your Petitioners, as in duty bound, will ever pray.

*Woolsey, Jameson & Co. Drogheda.  
Malcolm, Brown & Co. Dundalk.  
And nine others.*

Referred 26th of April 1828.

*Wm. Cotton.*

## TO THE LORDS OF HIS MAJESTY'S TREASURY.

The Memorial of the undersigned, the Distillers of the counties of Cork, Kerry and Limerick ;—

Showeth,

Referred by Mr.  
Cotton, 22 April  
1828.

THAT we are unanimous in representing to your Lordships that the laws for the regulation of our trade are insufficient for the due collection of the revenue arising from the distillation of spirits, and require amendments.

That we are now in the fifth year since, by the recommendation of the Commissioners of Revenue Inquiry, a new system of taxing spirits at a reduced rate of duty, and of licensing all kinds of stills, was adopted ; that the result has been, that by means of it a much larger quantity of spirits was made to pay duty, both in Scotland and Ireland, than had been previously ; that nevertheless it is notorious that great evasions have been made, particularly in Scotland ; and that smuggling, to a large extent in the licensed distilleries of Scotland, has existed since the alteration of the law, as well as before :

That if agreements against smuggling had not been made in this country, the laws in force and the staff of excise officers in Ireland would have been inadequate to effect the due collection of the revenue :

That for the two years after the 10th October 1823, we believe there was very little smuggling in licensed distilleries ; that in those years large quantities of grain were exported from Ireland to Scotland, and brought back to this country in the shape of spirits, because of the existence of smuggling in Scotland, that gave her advantages more than equal to charges of those transits ; that we are warranted in this assertion, knowing from experience that if the Scotch distillers paid full duties it would not be in their power to *continue*, as they have done, a sale of spirits at the late and present prices ; that owing to the differences that existed in the two countries, as to the regulation and duty on *malt*, further unfair advantages were given to Scotland, notwithstanding the repeated representations to your Lordships and to Parliament on the part of the distillers of Ireland, and even some of Scotland, on this subject ; that the result of the importation of Scotch spirits into Ireland was to lessen the price and annihilate the fair profit on spirits manufactured in this country ; that thus driven to seek for profit in another shape, many of the distillers of Ireland, in the third and fourth years, became smugglers in their own defence, and then, as before the 10th October 1823, there were notoriously two prices of spirits in the market, one with permit and the other without, and the payment of duty on a considerable quantity of spirits was then evaded :

That such evasions having been made almost with impunity, we would have been in this, the fifth year, driven to such practices likewise, had we not been able to effect an arrangement by which duty has been paid on every gallon of spirits sent out of our premises ; that by a voluntary oath, taken in good faith and adhered to scrupulously, we confidently assert that we have done that which the laws and the establishment of collectors and gaugers in Ireland were unable to do ; and we have thus given to your Lordships and to the country the best proof in our power that it is neither our interest nor our wish to be engaged in smuggling. We do not, however, deny, that if such a system were not adopted unanimously, and acted on universally in our district, our efforts to obtain so desirable an object would have been unavailing ; for if one distiller smuggles and can give cheap spirits to his customers, another must do the same at all hazards, or must give up his trade ; and we hope it will appear to your Lordships, that without the abolition of smuggling no cost of spirits can be defined, no rate of profit established ; and that the trader is as much interested in the due collection of the revenue, generally, as others can be, although he may not wish to be the accuser or the informer against his neighbour.

We respectfully submit for your reflection, that since the last October there have been permitted from our distilleries, to retailers and consumers in this district, more spirits by nearly one-fourth than in the corresponding period of the former year.

We beg leave to state, that we tried to make our regulation general throughout the country, but the majority of the distillers of Ireland were favourable to it ; that some, however, at a general meeting at Kilkenny dissented, and that the plan was thus frustrated. That in the mistaken confidence we had, that

we

we should be supported by authority herein, the dissentients were made known to the local Board in Dublin, and that we hear with regret that no stricter survey or watch was placed on such dissentients, than on those distillers bound by oath and paying full duties.

It is our duty to represent to you, that we are aggrieved by the smuggling in other districts; that we have constant temptations to resort to it for self-protection, and therefore we fear that without the assistance of parliamentary authority we have no prospect of our present year's agreement being continued next year. That however unwilling to rely wholly on oaths, we are yet convinced of their efficacy in certain cases, and we recommend that one be devised by which every person applying for a license for any distillery be required to make a return of every partner who shall have to take any part in the conduct of the business during such license, and that *all* such partners shall make oath that they will not, during the continuance of the license then applied for and about to be granted, send out or suffer to be sent out from such distillery any spirits that shall not have been charged and chargeable with duty, and a permit for them duly granted. We respectfully submit, that with a law framed in conformity with this principle, no prospect or thirst of gain would be sufficient to induce individuals of the rank held in society by the distillers of Ireland to outrage public opinion, and subject themselves to the imputation of perjury by any (however slight) violation of such oath:

That, practically acquainted with the subject of distillery revenue in all its details, we are willing to admit, that if officers of ability and integrity were placed on every licensed distillery, they could prevent almost wholly any smuggling therein, without any alteration of the law; but it does not consist with our experience that these can be relied on as a general protection to the revenue; and if the number of the distilleries be increased in Ireland, as they have been in Scotland, it is our opinion that nearly all the revenue from spirits would be consumed in the expense of officers necessary to survey them. It appears to us that any system of collecting revenue mainly dependent upon a strict survey by officers, and a licensing of distilleries of all sizes and in all situations throughout the country, cannot exist together; and that for the due and economical collection of the revenue, the limitation of this principle becomes absolutely necessary. We do not suggest to you the means of preventing the extension of distilleries, but we take leave to point out to you wherein the present establishments of Ireland would not be injured, and what would limit the means of smuggling in licensed distilleries even with the collusion of the officers, viz. the limitation of the gravity of the wash to the minimum of 60lbs. instead of 30lbs. as now. We are unanimously of opinion that this would be a beneficial alteration, and would secure a good deal of revenue without the intervention of additional excise officers. We believe that in a great many cases in Scotland the wash declared at 35lbs. and 40lbs. is actually 55lbs. and 60lbs., and the produce of the difference is smuggled; while if the minimum were 60lbs. the difficulty of working from much stronger wash would operate against such evasion of duty in this respect, and be harmless to the fair trader:

That we implore you no longer to continue paying allowance as for make of spirits from malt; that the pretence for it of preference as for malt spirits by the public is a mere delusion; what are called malt spirits in Scotland are not made from malt; and that in Ireland it has been availed of chiefly to recover duty on malt badly manufactured, or to get an undue drawback; that it has been availed of in Scotland to such an extent as to be a grievance, and to give an undue advantage to the distillers of that country in their competition with us.

We beg leave to notice the recommendation of some persons as to placing a muzzle or lock on our worms. We know it would be no security to the revenue; and even if we were not smuggling, we might be induced to pay money to the officers in charge to free us from it, on account of its inconvenience and of its danger to our property, in effecting a deterioration of the quality of our spirits, and for other reasons of minor consideration, and therefore not set forth:

That the concession of these reasonable claims shall confirm us ever,

Your Lordships' obedient, &c.

*Thos. Walker & Co.*

*Thos. Hewitt & Co.*

And thirteen others.

24th March 1828.

TO THE LORDS OF HIS MAJESTY'S TREASURY, &c. &c. &c. LONDON.

The Memorial of John Stein & Co. of Marlfield in the county of Tipperary, Distillers;—

Humbly sheweth,

THAT having perused a memorial addressed to your Lordships by the distillers of the counties of Cork, Kerry and Limerick, praying that your Lordships may be pleased to take into consideration the expediency of adopting means for the preventing of illicit trade in the licensed distilleries of Scotland and Ireland, and recommending for this purpose the administering of an oath binding on the parties applying for licenses, to refrain from any illegal practices in carrying on their business, we beg leave to express to your Lordships our entire concurrence in the prayer of that memorial, and most humbly entreat that your Lordships may be pleased to take the same into favourable consideration.

Which is humbly submitted by

*John Stein & Co.*

Marlfield Distillery, near Clonmel,  
31st March 1828.

We fully concur with our neighbours, Messrs. John Stein & Co. &c. &c.

*Thos. Matthew & Co.*

Referred, 22d April 1828.

*Wm. Cotton.*

Castlelake Distillery, near Cashel,  
2 April 1828,

TO THE RIGHT HONOURABLE THE LORDS COMMISSIONERS OF  
HIS MAJESTY'S TREASURY

MY LORDS, MAY IT PLEASE YOUR LORDSHIPS,

WE, the subscribers, distillers, residing in the North of Ireland, most respectfully beg leave to state to your Lordships, that we find ourselves aggrieved by the unequal provisions of the present malt law, whereby bere and big is allowed to be malted in Scotland at a low and inferior duty, whilst the same is not permitted to be done in Ireland. This provision, besides enabling the Scotch distillers to undersell us in our own market, we submit, is inconsistent with the principles of justice and equality that should regulate the trade and intercourse in spirits between the two countries; and we humbly contend, that the same indulgence ought also to be conceded to bere and big made into malt in Ireland, or that it should cease altogether in both countries.

We further beg leave earnestly to direct your Lordships' attention to that provision of the present distillery and malt law which allows a drawback of 1s. 2d. per gallon on spirits made from malt in Ireland and Scotland. This, as has already been shown to your Lordships, is the cause of great frauds and evasions, and of great loss and prejudice to the revenue, and notwithstanding some additional regulations which were enacted last year for equalizing the malt laws, and guarding against these frauds and evasions, the abuses pointed at are not remedied, but continue to prevail to the greatest extent; from all which we are convinced, that these mal-practices cannot be remedied by these regulations, and we therefore humbly beseech your Lordships to adopt measures for doing away with the drawback altogether.

And your Petitioners, as in duty bound, will ever pray.

*Woolsey, Jameson & Co. Drogheda.*

TO THE RIGHT HONOURABLE THE LORDS OF  
HIS MAJESTY'S TREASURY.

MY LORDS,

WE, the licensed distillers of Londonderry and its vicinity, having applied to your Lordships last year to be put on the same footing with the distillers of Scotland in respect to the permission to malt bere or big on the same terms as such grain is malted in Scotland, your Lordships were graciously pleased to promise, through Mr. Herries, that we should enjoy the same privilege as the Scotch, provided that "the Act for enabling your Lordships to equalize all duties that are greater in Ireland than in Great Britain," enabled you to do so, but that the session was too far advanced to allow such a relief to be afforded by the alteration of the Malt Assimilation Act, and Mr. Herries gave his opinion that the above-mentioned Act gave your Lordships the power of equalizing the duty on bere malt made in this country with the rates in Scotland.

We, therefore, do humbly entreat your Lordships to order the duty to be reduced on bere malt made in Ireland this season, to the same rate as is paid by the maltsters of Scotland, and without which there can be no equalization of the malt duties of the three kingdoms.

We have the honour, &c. &c. &c.

*Alexander Stewart.  
Ross & Smyth.  
William Cather.  
W<sup>m</sup> Moody, jun.  
W<sup>m</sup> Leathern.*

TO THE RIGHT HONOURABLE THE CHANCELLOR OF  
THE EXCHEQUER.

WE, the undersigned, Thomas Castle & Co. distillers of Bristol, respectfully beg leave to state, that since the distillery regulations passed in 1825, the English distiller has been engaged in a ruinous competition against the Scotch and Irish distillers: That they have imported very largely into this country, and have been selling their spirits in the great majority of instances at less than the cost of production to the English distiller: That the quantity of spirits imported from Scotland into England in the year ending 5th January 1827, was 3,217,159 gallons, being more than one-half of the whole consumption of England, whereas the importation of the two preceding years did not average more than 1,169,669 gallons: That such competition would not be complained of, if it arose from the skill and industry of the different parties, as under such circumstances a fair remunerating price would be the object of every competitor, but it is notorious such a price has not been obtained, and therefore it is inferred that the Scotch and the Irish distillers must have some other means from those of the fair trader to enable them to carry on so unprofitable an intercourse. It is stated in the memorial presented by the London distillers, "That from a return made to Parliament, it appears that for the year ending 1826, on a produce of 8,598,837 gallons, the Scotch distillers have accounted for less than the law required by 34,447 gallons, whereas the English distillers on a produce of 2,623,312 gallons, paid duty on more than was required by 164,860 gallons, and the Irish distillers on 9,895,567 gallons, exceeded the quantity by 628,696 gallons." It must be the object of such statement to shew the comparative work in the three countries, and if so, we presume it is not properly stated. It will scarcely be contended for, that the balance of the excess and deficiency of the whole of the distilleries in either country is the proper criterion to judge of the work of each respective trader. For example, if one distiller should be 2,000 gallons short of the quantity required by law, and another distiller produce 2,000 gallons more than required, it is obvious that the excess of the one has no right to neutralize the deficiency of the other, such an application of the two products would confound every distinction in the comparative work of the individuals, and prevent a due appreciation of the results. This, however, is the mode adopted by the London distillers, but it gives a very defective view of the facts. The whole quantity of spirits distilled by the Scotch

distillers was, as before stated, 8,598,837 gallons upon 4,485,017, of which there appears an excess of 92,917 gallons. On the balance of 4,113,820 gallons, (making together the total quantity of 8,598,837), there is a deficiency of 127,364 gallons, equal to three per cent. short of the quantity required by law, and more than five per cent. compared with the other distillers of the same country, so it is not a deficiency as stated in the memorial of the London distillers of 34,447 on 8,598,837 gallons, but of 127,364 on 4,113,820 gallons, being less than one half of the total quantity made. If the comparison be continued, the work of a very large number of the Scotch distillers will appear more than nine per cent. short of what is produced by the English distillers. This fact will of itself prove that it is not by any superiority or skill in the manufacture of spirits that the Scotch are enabled to undersell the English distillers, and therefore must be attributed to some other powerful cause. In support of this, it may be confidently asserted, that if spirits were an article of commerce, without having any duty attached to it, there would be no Scotch or Irish spirit at the present prices now in the English market. From the testimony of many respectable distillers, both in Scotland and Ireland, it is admitted that frauds are carried on by licensed distillers to a very great extent, threatening a total subversion of the fair trader. The existence of such practices has been long known to the whole department of Excise, and although it can only prevail through the neglect or corrupt connivance of its officers, yet no efficient measures have hitherto been adopted for the correction of so extensive an evil. That it is by the commission of great frauds upon the revenue, the Scotch and Irish are enabled to send such large quantities of spirits into this country at so low prices, there can be no doubt, and if permitted to continue, the English distiller must very soon close his doors. If any doubt could be entertained of the evasion of the law, nothing is more calculated to remove it, than the extraordinary circumstance of many of the Irish distillers taking voluntary oaths not to smuggle for a definite period, and from the fraudulent practices still carried on by those who refused to be parties to such an engagement, those who are now restrained by their oath, are losing their business by being undersold, and it is certain they will not bind themselves to pay the duty after the present season of work. We respectfully submit, that so gross a violation of law ought not to be permitted to the destruction of the fair trader and the decrease of the revenue. It is humbly presumed that the English distillers are entitled to some consideration from the Government, for it has been acknowledged that an equal amount of revenue has not been collected from any other source with so much facility and security as from the English distilleries. We beg to advert to an enactment which gives the Scotch distillers a great advantage over the English distillers, by allowing a drawback of 1s. 2d. per gallon on spirit made from malt only, when it can be shewn by an account given in the Parliamentary Reports, that a remunerating price has been obtained for the same, independent of such drawback; the amount claimed by the Scotch distillers from the 10th October 1823, to 10th October 1827, was £.957,089 18s. 6d. being nearly £.240,000 for each year, paid to them as a bonus, since the existence of any necessity for such an allowance cannot be supported. From the admission of many traders in the countries, they much wish such drawback abolished, it being a strong temptation to perjury, and a most prolific source of fraud. On the part of the English distiller it cannot be too strongly impressed, that it is not against the great importation of Scotch and Irish spirits into the English market that he complains, but that such spirits are sent and sold at prices lower than they can be manufactured for in this country. That the Scotch and the Irish distillers are not enabled to do this by any superior skill in the manufacture has been proved, and any investigation on this point may be challenged without fear of discomfiture; it therefore can arise from no other cause than evasion of duty. To give some check to the fraudulent practices now complained of, we beg leave to call particular attention to the coursing mode of survey so strongly recommended by Colonel Doyle and Mr. Carr in their evidence given in the Appendix to the Second Report of the Commissioners of Inquiry, as in our opinion more calculated to prevent collusion between the trader and the Excise officer, than any other plan that can be adopted. Secondly, The abolition of all gravities of worts below 60 degrees, the present existence of which affords the greatest evasion of duty, and renders abortive in a great degree the vigilance of any superior officer, unless he be almost constantly on the spot.

From

From the information we have obtained on this head and our experience as practical distillers, we cannot urge this too strongly, and it would of itself go a long way towards removing the existing evils. Thirdly, The repeal of the malt drawback, not only as it gives undue advantage over the distiller in this country, but as an unnecessary decrease of the public revenue for the gain of private individuals, and a source of great fraud and falsehood.

Whatever measures the Right honourable the Chancellor of the Exchequer may ultimately adopt, it is hoped that to prevent an evasion of duty will be the principal object kept in view, for in proportion as this is effected will the interests of the fair trader be secured.

We therefore implore that our situation as English distillers, which is produced by an unequal operation of the laws, may have the most serious consideration, and that the present session of Parliament may not be allowed to pass over without our obtaining such redress as the justice of our case is entitled to.

*Thomas Castle & Co.*

Dated 9th May 1828.

TO THE RIGHT HONOURABLE THE LORDS COMMISSIONERS OF  
HIS MAJESTY'S TREASURY.

The Memorial of the undersigned Corn Distillers of London ;—

Sheweth,

THAT your Memorialists have been for many years engaged in a manufacture in which they are obliged to embark very large capitals, to enable them to pay weekly duties to a great amount into His Majesty's Exchequer.

That since the alteration of the Distillery Laws, the interests of your Memorialists have been very materially injured by a large importation of spirits from Scotland and Ireland, sold at a price at which they cannot be made in this country, and that notwithstanding the continual diminution in price, these importations rapidly increase :

That the Scotch and Irish distillers are not enabled thus to send spirits to this country from any local advantage which they possess over the English distiller, your Memorialists have every reason to believe, for after having made most active and impartial inquiries from experienced persons in both countries, they are quite convinced that any advantage which the Scotch or Irish distiller may possess, from cheapness of rent, labour, fuel, &c. is more than counterbalanced by the expense of the freight, &c. of spirits sent to this market :

That they are not enabled to do so from superiority of manufacture, is evident from the Parliamentary Reports, by which it appears, that your Memorialists have drawn a greater quantity of spirits from a certain number of degrees of attenuation than either the Scotch or Irish distiller ; and although it is urged by the Scotch and Irish distillers that they use a cheaper corn than the English distiller, yet many years of practical experience enable your Memorialists confidently to assert, that although inferior corn may be used in distillation to a certain extent, yet beyond that, it cannot be used without either injuring the quality or diminishing the quantity of the spirits :

That the duty is evaded, and to a very considerable extent, both in Scotland and Ireland, respectable distillers of both countries readily admit ; that such fraud is frequently carried on with the connivance of the excise officer is notorious ; and although much improvement may be made in the system of survey, yet your Memorialists are aware, that where there are so many distilleries scattered over the country, as in Scotland and Ireland, it would be attended with enormous expense, and indeed be almost impossible that they could be surveyed as in England. Under the former Distillery Laws, all distillers working for the English market were obliged to enter their houses for that specific purpose for twelve months ; if that system were re-adopted, those houses might be especially surveyed without any considerable extra expense, such a measure would be a very great protection to the revenue, and would tend in a great degree to protect the English distillers from those frauds by which he is now suffering.

370.

B 4

Your

Your Memorialists beg to submit to your Lordships' consideration the manner in which the duty is paid in Scotland and Ireland. In England, your Memorialists are obliged to pay the duty upon all spirits within a limited number of days from the time when such spirits are manufactured; whilst in Scotland and Ireland, the distillers having made any quantity of spirits, however large, is enabled to bond such spirits free of duty; and upon a payment of a very small proportion of the English duty, can at any time send them over to this country, where he is not compelled to pay the remainder of the duty until three weeks after their arrival. Such a system, your Memorialists conceive, opens the door to every kind of fraud, and they humbly submit, that all spirits made for the English market should pay the whole duty immediately upon their manufacture, as in this country.

To these points your Memorialists beg to call your Lordships' attention. Their adoption would give to the fair trader a protection to which he submits that he is justly entitled. Immense sums of money have been for many years weekly paid into the Exchequer by the London corn distillers, justly and fairly collected, and with comparatively small expense in the collection; a very short time will entirely overthrow this system; the fair trader will find it impossible long to compete with fraud, and the distillery of England will be thrown into the hands of men, whose only chance of profit must necessarily arise from defrauding the revenue.

Your Memorialists have suffered, and suffered most materially, from repeated delays; they have applied to His Majesty's Chancellor of the Exchequer, and they trust your Lordships will not allow any time to pass without taking this subject into consideration, and adopting such measures as shall protect the revenue, and prevent the annihilation of the English distillery, which, under the present system, must be speedy and certain.

*Curries, Weymouth & Co.  
Vachell & Moore.  
W<sup>m</sup> Booth & Co.  
Tho' Smith & Co.  
John Atlee & Co.  
T. V. Cooke & Co.*

TO THE RIGHT HONOURABLE THE CHANCELLOR OF  
THE EXCHEQUER.

The humble Memorial of Francis Edward Williams of Worcester,  
Corn Distiller;—

Sheweth,

THAT Your Memorialist, after an expenditure of several thousand pounds in altering his distillery to suit the new laws, finds himself so much undersold by the Scotch and Irish distillers, as to be unable to maintain a competition with them without experiencing the most ruinous consequences. That it appears by some of the Returns lately laid before Parliament, the Scotch distillers are enabled to maintain the exclusive possession of their home market in Scotland, export a quantity of spirits to Ireland, exceeding 200,000 gallons the quantity sent in the same year by Ireland to England, and in addition to this, actually sent in the year ending 5th January 1827, 3,217,159 gallons into the English market, being more than half the consumption of England: That your Memorialist would not complain of the hardship he experiences if it arose from the superior skill and industry of the Scotch and Irish distillers, and from their natural and local advantages: That as respects skill, he begs to refer to the Parliamentary Returns, from which it will appear, he has produced and paid the duty on a greater quantity of spirits, according to the gravity weight, than the average of the Scotch and Irish distillers, who by the present law, are allowed work at a gravity so low as to leave a great opening for fraud; yet it appears by repeated experiments, that although the spirit distilled from such low gravities is in no respect superior in quality from that made from worts of sixty or sixty-five degrees, while at the same time the cost of production in the different items of labour, fuel, wear of utensils, &c. is much increased, and the value

value of the spent wash used in feeding cattle is diminished : That your Memorialist cannot consider the entire exemption from the law of the poor-rate in Ireland, or the trifling charge in lieu of tithes in Scotland, or the different law for regulating the paper currency, natural advantages, but on the contrary as a bonus allowed to Scotland and Ireland in favour of their agriculture and manufactures. But above all, your Memorialist has to complain of the inefficiency of the execution of the Excise laws in Scotland and Ireland ; in the latter country it is notoriously known, that the only security the honest trader has at present, is a voluntary oath taken by many of the distillers not to smuggle during the present year.

But although your Memorialist is not in possession of so strong a fact, in relation to the Scotch distillers, yet he has a right to presume, when he finds that corn goes from England and Ireland to Scotland, to be manufactured into spirits, and that the Scotch distillers do not produce to the sight of the Excise officers so large a portion of spirits, according to the gravity of the worts, as the English distillers do, that the revenue laws are grossly evaded, particularly when professing to distill from malt only, as they obtain a drawback of 1s. 2d. per gallon on all spirits made from malt, and this drawback may be received from the Excise collectors some months before the duty is actually paid on the malt ; now your Memorialist humbly submits, that as the public pay such a price for malt whiskey as amply remunerates the distiller for manufacturing whiskey from malt only, that this drawback ought to be disallowed, by which one source of fraud will be cut off.

Your Memorialist also hopes His Majesty's Government will enforce a more strict mode of surveying the distillers than has hitherto been effected, in Scotland and Ireland, by frequently changing the Excise officers, and enforcing the coursing mode of survey as recommended by Colonel Doyle and Mr. Carr, in their evidence before a Committee of the House of Commons ; and that all distillers in Scotland and Ireland entering to work for the English Market, shall be compelled to pay the duty at the same time and in the same manner as the English distillers do ; for unless the distillers in all parts of the empire are put on an exact equality in this respect, it is utterly impossible the English distillers can support the competition with the Scotch and Irish.

Your Memorialist implores that the case of the English distillers may be taken into consideration before the expiration of the present session of Parliament.

(signed) *Francis E. Williams.*

30th May 1828.

UNTO THE RIGHT HONOURABLE THE LORDS OF  
HIS MAJESTY'S TREASURY.

The humble Petition of the under-signed Maltsters in Campbelltown ;—

Sheweth,

THAT Your Petitioners understand it is in contemplation to frame a new Malt Act for the United Kingdom, and as they are in a situation separate and distinct from the makers of malt from barley, they humbly beg leave to submit their case to the consideration of your Lordships :

Bear or bigg is peculiarly the growth of the Highlands of Scotland and the North of Ireland, and this species of grain requires a very different process in the malting operation from barley, which is the growth of a dryer climate and richer soil.

All bear or bigg made into malt by your petitioners, requires to be kiln-dried and indrinks from ten to twenty five per cent., according to the season, so that it is impossible to prevent a variation of more than five per cent. as is required by the present Act.

Bear or bigg will rot if kept so long under water as is necessary for barley.

For time immemorial the maltsters of this county were in the habit of drying malt soft, so as to improve the quality of the spirits made from it. The quantity measured from the kilnhead, always exceeded the grain wetted ; but since the passing of the present Act they have been obliged to dry their malt harder, break the coomings on the kilnhead, and screen the malt, so as to prevent

370.

C

a swell

a swell and save the extra duty; but they find that this injures the quality of the spirits, and deteriorates the value of the malt.

The Petitioners convinced, that unless the above peculiarities in bear or bigg be recognized in the Act, their trade of malting from that species of grain will be completely put a stop to, would humbly solicit,—

1st.—That an alteration may be made with regard to the barley book, so as to meet the peculiarity attending bear or bigg, and the variation of the seasons :

2d.—That bear or bigg should only be kept under water in the cistern from twenty-five to thirty hours in summer, and from forty to forty-five hours in winter; and in the cistern from twelve to sixteen hours in summer, and from twenty to twenty-six hours in winter :

3d.—That a mode of charging the duty on malt be established so as to occasion no increase of duty when the trader finds it expedient to dry it in any particular way.

May it therefore please Your Lordships to give such relief to the Petitioners in the premises as may appear just and reasonable, and your Petitioners shall ever pray.

---

At a Meeting of the Maltsters of Argyllshire, held at Campbelltown on the 17th March 1828, (*inter alia*)

THE Meeting having resumed consideration of the late Act of Parliament relating to the manufacture of malt in the United Kingdom, and of certain general orders of the Commissioners of His Majesty's Treasury, affording temporary relief from some of the obnoxious clauses of the said Act, came to the following resolutions :

1. That the said general orders, which afford at best but a temporary relief, are not calculated to give security to the maltsters of the nation in pursuing their trade; and it is the opinion of this meeting, that to attain that object many other clauses of the Act in question, particularly injurious, should be removed.

2. That this meeting is persuaded that a considerable reaction in illicit distillation, which has of late taken place in this district of the country, is attributable to the oppressive nature of several of the enactments of the said statute, which tend to discourage the fair trader from pursuing his trade to the same extent as formerly, by which means the field is left open to the illicit trader.

3.—That the Act in question appears to have been framed without due regard to the different qualities of grain which exist throughout the nation, and consequently the mode of operation and length of time for conducting the same, established by the Act of Parliament, is particularly injurious as regards that description of grain, known under the name of bear or bigg, which, from its light quality, susceptibility of vegetation and aptness to sustain injury, requires much less time to malten than barley, and in some stages a difference in the mode of operation; that grain is peculiar to the Highlands of Scotland and north of Ireland, the climate of which does not admit of the cultivation of grain of a richer quality.

4.—That

4.—That it being absolutely necessary, in order to preserve bear or bigg, to kiln-dry the whole, a diminution in the quantity is thereby occasioned, not less than three to five bushels in twenty, and therefore the proportion allowed for such diminution or indrink in stock, by the 17th section of the said Act of one bushel in twenty, is quite inapplicable to that description of grain, and this meeting is persuaded that a greater proportion ought to be allowed.

5.—That the whole enactments relating to the stock of grain kept by the trader, and the barley-book, which by the said Act he is required to keep, appear to this meeting to have no effect whatever in preserving the revenue, while they occasion incalculable annoyance and inconvenience to the trade; and nothing can, in the opinion of this meeting, be more objectionable and injudicious than the clause of a former Act, still preserved, requiring hours notice to be given to the officer of Excise before a trader can receive into his stock any quantity of grain which he may have purchased, and the absurdity of this requirement will appear, when the small quantities of grain, which the farmers of this country bring to the trader at one time, and the frequency with which they bring these quantities, is considered.

6.—That after long experience, this meeting is satisfied that from *twenty-five to thirty hours in summer, and forty to forty-five hours in winter*, is as great a length of time as bear or bigg can sustain with advantage the process of wetting in the cistern, and not longer in the couch-frames than twelve to sixteen hours in summer and twenty-six hours in winter, and therefore the meeting view the 23d and 32d sections of the Act as requiring great amendment.

7.—That this meeting considers that by the 42d section of the said Act, an additional duty is imposed by the length of time which it is enacted that malt must remain on the floor before a certain deduction is made in the gauge thereof, whereby the charge of duty is regulated. Bear or bigg is frequently in the summer season at its greatest growth or swell, when not more than forty hours from the cistern, and the meeting conceive that the deduction of one-third part of the gauge then taken should be allowed, and that a fair computation of the actual quantity of malt on such floor is not ascertained by withholding that deduction until ninety-six hours from the time when the grain has been emptied from the cistern, as fixed by the said section of the Act.

8.—That the mode of charging the duty by measuring the actual number of bushels of dried malt from the kilnhead, *if it be found that by such measurement* a greater duty will arise than by charging from the gauge of the floor while in operation, or from the actual quantity of grain put into the cistern, appears to this meeting unfair, as in every instance in which that mode of charging the duty is adopted, the trader pays for a greater quantity of grain than he actually wetted, owing to the manner in which the malt is dried on the kiln. From time immemorial the maltsters of this country have been in the habit of drying their malt, so soft that the quantity of it measured from the kiln exceeds the quantity of grain wetted; but this mode of drying they adopt from their conviction that it improves greatly the quality of the whiskey; and it appears to this meeting highly injurious; that by the Act of Parliament under consideration, the trader should be necessitated to give up the exercise of his own skill and judgment in the management of his own business, or incur a serious additional duty. It is quite possible, and for porter brewing it is necessary, that malt be so dried that the quantity taken from the kiln be less than the quantity wetted; and it therefore appears to this meeting that no more equitable mode of charging the duty can be than by laying it on the quantity of dry grain put into the cistern.

9.—That by the said Act many penalties are imposed for transgressions by which no fraud can possibly be intended, and which are therefore quite useless for the protection of the revenue, while they leave the trader completely under the power and caprice of the officer of Excise.

The meeting request their chairman to transmit copies of these resolutions to Mr. Campbell of Islay, Mr. Kennedy of Dunure and Mr. William M. K. Clark, the deputy of this society in London.

(signed.) John Beith, Chairman.

At a Meeting of the Maltsters of Argyllshire, held at Campbelltown the  
26th day of May 1828.

THE Chairman laid before the meeting an abstract of the proceedings of the Maltsters' Association in London, at a conference with the Chancellor of Exchequer, held on the 10th day of May, current, whereby it appears that no notice is taken of the disparity of the quality of bear or bigg as compared with barley, and that the evils imposed by the 17th and 23d sections of the Act have not at all been adverted to by the Association.

The meeting, therefore, recommend to the chairman to lose no time in calling on their deputy, Mr. Clark, to impress on the Association, or the deputies appointed by it, the absolute necessity of making the said clauses subject of remonstrance with the legislature, and also of pointing out the inefficiency of the proposed relief by the alteration on the 32d and 42d clauses of the Act. The meeting further recommend to the chairman to request of their deputy to wait upon the members of Parliament for this county and burgh, and solicit their particular aid and support in furthering the views of the meeting.

It appearing by the report of the chairman that he has not transmitted copies of the resolutions of last meeting to Mr. Kennedy of Dunure, or Mr. Clark their deputy, it is requested that he may immediately do so, accompanied by a copy of this minute, as it appears to this meeting that an effectual check will be given to the making of malt from bear or bigg, unless the relief suggested by the said resolutions be fully granted.

(signed) *John Beith, Chairman.*

Barley Book,  
I.  
Variation in Stock.

The allowance of five per cent. for the variation in stock decidedly is not sufficient, inasmuch as the state of barley in Ireland, when purchased, is almost universally damp. The maltster is necessarily obliged in many cases to kiln-dry his barley before he malts it; this causes a reduction in bulk of from ten to twenty per cent. In Scotland and North of Ireland this is most particularly the case, especially as regards bear or bigg.

The barley in Ireland is likewise very foul, from the slovenly manner of dressing, as in ninety cases out of a hundred the corn is threshed in the open road or field. Such corn, before malting, is further reduced in bulk by the necessary additional cleaning.

Another serious objection, in Ireland, to the regulation contained in this section is being compelled to enter in bushels the exact quantity purchased of every individual.

The farmer bringing such small quantities to market at a time, and selling by weight, not measure, makes it next to impossible to reduce correctly the weights to measure; for instance, the house of Strangmore & Co. of Waterford purchased, on the 11th, 12th and 13th of October, 325 barrels 7 stone from no less than seventy individuals, averaging only four and a half barrels each person.

The lowest was a sale of five stone, and the highest 31 barrels 5 stone 1 pound.

To avoid one penalty it is now absolutely necessary to run the risk of incurring another; for if a maltster wishing to do every thing the law enjoins him, viz. enter all his barley, he cannot avoid the penalty of 200 *l.* for having entered more barley than he has in reality steeped.

Hence the strong presumptive evidence of fraud in privately steeping. Or, to avoid such a twofold penalty, he chooses to omit regularly entering within ten or fifteen per cent. of the exact quantity he purchases—by the latter he chooses the lesser evil, inasmuch as it would be more difficult to detect, and if detected, no great proof of fraud, as his previous purchase entered and his steeping agree.

10 per cent.

We therefore propose as a remedy, that the allowance for difference in stock of barley in Ireland, and upon bear or bigg in Scotland, be ten per cent.

STEEPING.  
Sec. 25.

Bear or bigg, from its light quality, is so rapid in vegetation, it requires much less time to malt than barley, and is consequently very susceptible of injury,  
and

and will not bear so much water in cistern without sustaining considerable injury; they therefore apply for *leave to drain their cistern* when malting bear or bigg at the expiration of *thirty hours* between the months of March and October, and as at present *forty hours* from October to March.

Bear or bigg, in mild weather, is most commonly at its greatest growth or swell at forty hours from the cistern, and at all seasons at from fifty to seventy-two hours; consequently the seventy-two hour gauge, allowing one-third, will and does cause a great surcharge. The charge arising upon this gauge at present upon barley is from two and a half to five per cent.

72 hour Gauge.  
Sec. 42.

We further ask that in all cases of floor or surcharge a notice shall, within one hour, be left in writing with the maltster, or some person in his employ upon the premises.

CERTIFICATES.—In Scotland this presses considerably harder than in the West and North of England; for in the exercise of the skill and judgment of the whiskey distiller they find malt dried soft highly preferable, not from the quantity of spirit obtained per quarter, but for the preferable flavour obtained from malt dried soft to that which is close-dried.

Sec. 47.

W. Ford, Maltster,  
Nine Elms, Surrey, near Vauxhall,  
June 10, 1828.

TO THE RIGHT HONOURABLE THE LORDS COMMISSIONERS OF  
HIS MAJESTY'S TREASURY.

The Memorial of William Young & Co., Malt Distillers at Grange,  
in the County of Fife;—

Showeth,

THAT by the Act 6 Geo. IV. c. 58, an allowance of 1 s. 2 d. per gallon is granted to distillers in Scotland and Ireland on spirits made from malt only: That the means provided by that Act having been found ineffectual to protect the revenue against evasions which were practised, a further provision was made by the 7 & 8 Geo. IV. c. 52, s. 74 & 75; but your Memorialists, who entirely work from malt and obtain this drawback, firmly believe that neither these nor perhaps any provision that can be made will be sufficient to protect the revenue, or to prevent those distillers who use malt only from deriving advantage by means of this allowance, at the expense of the revenue and fair trader; for while so much depends on oaths and solemn declarations, traders, taking a different view of these things, do thereby place the parties very unequal.

Your Memorialists therefore humbly pray, That the aforesaid allowance of 1 s. 2 d. per gallon on spirits made from malt may be discontinued.

Wm. Young & Co.

Grange Distillery, Burtisland,  
June 6, 1828.

TO THE RIGHT HONOURABLE THE LORDS COMMISSIONERS OF  
HIS MAJESTY'S TREASURY.

The Memorial of the undersigned Distillers in Cork and Limerick;—

Humbly showeth,

THAT Memorialists were requested by the body of distillers to invite your Lordships' attention to certain abuses in their trade, arising from the present state of the law for collection of the duty on spirits in the United Kingdom, and to the necessity of a prompt alteration therein:

370.

C 3

That

That Memorialists have been honoured by interviews with the Right honourable the Chancellor of the Exchequer, and endeavoured to afford him information convincing as to the existence of great abuses in Scotland as to smuggling, and of the facility with which such abuses might be carried on more extensively in the other parts of the kingdom :

That Memorialists, upon such showing, were with great courtesy and attention invited to further conferences with the Commissioners of Excise and their solicitor; and they believe that these officers have the intention and hearty disposition to check such abuses, as far as the law enables them; but your Memorialists humbly represent that such are the defects in the law that an alteration therein is requisite, before a survey by officers can be effective in remedying the evil:

That Memorialists have much satisfaction in believing that there exists between them and the solicitor of Excise no difference of opinion as to the propriety of certain alterations in the law calculated to effect their common object—a better security to the collection of the revenue on spirits; viz. by doing away the drawback on malt spirits, or by limiting it to small stills where its application is in other respects deemed proper; and by raising the minimum of gravity of wash from 30 lbs. to 60 lbs., wherein also an exemption in favour of such small stills may be made, if deemed desirable.

Your Memorialists have heard, however, with great regret that this session of Parliament is like to pass off without any alteration being made in the law, although the trade are almost unanimous in believing that such alterations as suggested would, with a more efficient survey by the officers, encouraged by an equitable arrangement of salaries, go very near effecting a complete collection of the duties, without in any way pressing on the trader more than the present regulations press; and against the injustice of such delay your Memorialists have very humbly to implore the consideration of your Lordships.

Your Memorialists therefore respectfully entreat that an immediate alteration may be made in the law; and your Memorialists will pray.

*Dan Callaghan of Cork.*  
*John Brown of Limerick.*

London, 2d July 1828.

(Transmitted by Mr. Stewart's letter of the 24th July 1828.)

TO THE RIGHT HONOURABLE THE LORDS OF  
HIS MAJESTY'S TREASURY.

The Memorial of the Spirit Dealers in the City of Londonderry;—

Most respectfully Showeth,

THAT we the undersigned spirit dealers of the said city had occasion to address the honourable Board of Excise a short time since, relative to the serious grievance and inconvenience we experienced, in not being allowed to send out in the same day different kegs of the same kind of liquor, under a penalty of £.200. (two hundred pounds,) according to Act 6 Geo. IV. s. 117, which circumstances we now feel, and have felt, are grievously vexatious and harassing, as well as seriously injurious to the revenue, which, on due reflection, will be considered by your Lordships as too vexatious to be any longer continued against the fair legitimate dealer in the spirit business, and against the unjust and cruel operation of said Act of Parliament, we forwarded said petition to the honourable Board of Excise, praying for immediate redress thereof.

And whereas by some additional clauses in the foregoing recited Act, which were not made known to us at the time we transmitted the memorial above referred to, otherwise we should have availed ourselves of the adoption of such additional arguments against the said additional clauses, as might have weighed considerably for the discontinuance of said Act, inasmuch as the operation of the same is so prejudicial to the interests of the spirit dealer, as well as essentially

tially destructive to the Excise revenue. By the section ~~+++~~ of said Act, those retailers who receive, by permit, a less quantity than eighty gallons before he opens the package or breaks bulk, he must first notice the officer of Excise, and wait *two hours*, at his convenience to attend, under confiscation of same, and a penalty of £.200. in case of neglect to do so. From the nature and trade of this part of the country where our customers are, and the extent of the officer's business, it will be impossible for either retailer or dealer to fulfil the law in this case. The publican of very moderate means, (which is the case in this neighbourhood, in nine cases of ten) comes to this city to purchase his stock, as he terms it; he will purchase four or five gallons of spirits, which he has to carry home on his back a very considerable distance; and, although with the permit in his pocket, he finds he cannot dispose of one glass of this to his customers, who are, in all likelihood, waiting for it. He is then obliged to set out again, and traverse a distance of from twenty to thirty miles to notice the revenue officer, and wait some hours for his attendance and inspection before the spirits can be disturbed, under a penalty of £.200. Under these circumstances it cannot be supposed that the publican will delay getting illicit spirits, instead of getting a supply from spirit dealers, when by having a legal cover or permit, he is subject to such restrictions.

We call your Lordships attention to this district where our principal customers reside; for instance, in the ride of Ennishowen, (the residence of the Excise officer is Muff, which place is a distance of five miles from Derry, and where the only growing duty is arising from a tan yard.)

The distance from Muff to Malin Well, a part of this officer's business, is about twenty-five miles; from Muff to Greencastle, fifteen miles; to Carn, ten miles; besides many other places equally remote, without any direct line of road.

Fannit, a wilder country, and more extensive, and much more given to illicit distillation, is bounded on one side by Loughswilly, and on the other side by Mulhoy. The officer's residence is Ramilton. Dunfanaghy is much more extensive than either; and we are informed many other places of equal extent; It would, therefore, appear that the legislature did not contemplate these difficulties, that a subject would be obliged to walk a distance of from twenty to thirty miles to notify the officer, before he could make a sale of the small quantity of three or four gallons of spirits legally permitted. In many cases, a quantity of illicit spirits might be purchased by him at his own door, without his being subject to such restrictions. By the sect. 117, of the same Act, it requires that no retailer shall receive into his stock, unless the permit shall express the kind and strength of the spirits so removed under said permit, without any allowance made for per centage; this, if insisted on, would in all cases subject the goods to forfeiture, as no two instruments perfectly agree. Neither could it be possible that a small keg, after being washed out and filled with whiskey, could come within some degrees of its original strength, when tried by an officer a day or two after. We respectfully hope your Lordships will now see the necessity of affording every facility to the fair trader, to enable him to carry on his trade and compete with sellers of illicit spirits, and thus enable the dealer to send into the country, legal duty paid whiskey in all quantities, and in such a way as may be required by the country publicans, free of unnecessary obstruction and inconvenience to them; so that all parties, wishing to promote the interests of the Excise revenue, may have it in their power so to do, which must encourage His Majesty's subjects to feel an interest in attending to the law, and which must be the principal means of also promoting the revenue. We therefore humbly pray, that your Lordships will take our case into immediate consideration, for the present, our business with the country must be suspended, and our profits of course destroyed.

Londonderry, 29th Nov. 1828.

TO THE RIGHT HONOURABLE THE LORDS COMMISSIONERS OF  
HIS MAJESTY'S TREASURY.

MAY IT PLEASE YOUR LORDSHIPS,

THE annexed memorial of James Watt and others, of the city of Londonderry, dealers in spirits, complaining of the operation of the Act 6 Geo. IV. c. 80, having been referred to us by your Lordships' commands;

We have to report that, by the Act c. 45, of the last session of Parliament, the provisions of the Act 6 Geo. IV. c. 80, in force for regulating the business of spirit dealers and retailers in England, were extended to dealers and retailers in Scotland and Ireland.

The provisions complained of by the Memorialists, are—

- 1st. Not being allowed to send out, in the same day, different kegs of the same kind of liquor.

To this we beg leave to observe, that the Memorialists appear to misunderstand the restriction, as the law does not prevent them from sending out in the same day, as many different casks of the same kind of liquor to as many different customers as they may think proper. The restriction, however, to which the Memorialists probably allude, appears to be the 127th section of the Act, which enacts that no dealer, &c. shall be allowed to take out more than one permit in one and the same day to any one person, and that each permit shall be granted for the removal of no more than one cask of spirits of the same kind, except the casks contain eighty gallons or upwards.

This restriction has been in force in England with regard to foreign spirits many years without complaint; and since the extension of it to British spirits, on the 5th January 1826, by the Act 6 Geo. IV. c. 80, no material inconvenience has resulted from its operation; and as the Memorialists' objections are not founded on any case of hardship or inconvenience that has actually occurred, but only to such as may possibly happen, they furnish, we conceive, no sufficient ground for an alteration of the law in this respect.

The next head of complaint is, That notice must be given to the surveying officer, before a trader is allowed to open or break bulk of any spirits he may receive.

The inconvenience which might probably attend a rigid enforcement of this regulation in remote districts has been before under our consideration, and directions have been given for relieving the traders who reside at a distance from the officer from its operation, and the objections of the Memorialists have thereby been removed.

The third and last subject of complaint is the regulation by which the kind and strength of the spirits removed are required to agree with the strength and quality specified in the permit.

To this objection it may be observed, that unless such an agreement be insisted upon, the permit can be of no use. The agreement, however, is considered sufficient in all cases, where the variation is not greater than may fairly be attributed to unavoidable causes.

In conclusion, we beg leave to observe, that by the Act complained of, dealers and retailers of spirits in Ireland have been relieved from much greater inconveniences than those to which they are now made subject; and that as the Act came into operation so lately as the 10th of October last, the Memorialists' apprehensions of its effects upon their business are premature, and for the most part unfounded; and we are of opinion, that the measure of relief already granted will leave them no just cause for complaint.

We are, &c. &c. &c.

TO THE RIGHT HONOURABLE THE LORDS OF  
HIS MAJESTY'S TREASURY.

The Memorial of the undersigned Maltsters of Londonderry and its vicinity ;—

Humbly Sheweth,

THAT Your Petitioners cannot procure two rowed barley, it not being cultivated in this part of Ireland, and consequently they are obliged to use four rowed, commonly called bere or bigg, which grain is permitted to be malted in Scotland at one fourth less duty than Petitioners are obliged to pay :

That the malt made in this part of Ireland, weighs on the average twenty per cent. less than the malt made from two rowed barley :

That large quantities of four rowed barley or bere are annually sent to Scotland, and there malted at the reduced duty, thereby giving a bounty to the Scotch maltsters and distillers :

That when the Irish market was opened to the Scotch distillers, a distinct pledge was given to the Irish distillers that the trade in each country should be placed on a footing of perfect equality, and which has not been done.

Your Memorialists therefore humbly pray, that they may be placed on the same footing as the Scotch, and that your Lordships will order a return of the difference of duty between the duty they have paid and the duty charged on bere malt in Scotland, from the passing of the Assimilation Act in July 1823 to the present date,

And Memorialists, as in duty bound, will ever pray.

Newton Limavady, March 25, 1829.

TO THE RIGHT HONOURABLE THE LORDS COMMISSIONERS OF  
HIS MAJESTY'S TREASURY.

WE, the undersigned distillers in Dublin, with great respect beg leave to state, that we had the honour to address a memorial to your Lordships, under date the 16th of April 1828, on the subject of the distillery law and survey, which we represented as being ineffectual in securing a full collection of the duty on spirits, and we at the same time took the liberty of recommending certain measures, the adoption of which would, we humbly conceived, tend to the advantage of the revenue and the protection of the fair trader. These measures were, the improvement of the survey by the employment, in all situations, of officers of rank in the Excise, experienced in distillery duty, and an alteration of the existing regulations.

1st.—By not allowing any gravity of wash lower than sixty degrees.

2d.—By the total repeal of the drawback allowed on spirits, appearing to be made from malt only.

3d.—By obliging the distiller previous to his obtaining a license, and his active partner or partners, to take an oath not to evade the duty or allow it to be evaded.

We believe that your Lordships had not time during last session of Parliament, to take into consideration the alterations which we suggested in the distillery law; but a disposition has been shown to attend to our recommendation on the subject of the survey. A greater number of officers of superior rank have, since the commencement of this season, been employed, and in those places which have been the scene of their exertions, (as in this city) a greater degree of vigilance has been observed in the execution of distillery duty. But while we make this acknowledgement, we are compelled at the same time to state that it has not been found possible to extend a similar improvement to all situations, and we are therefore the more confirmed in the opinion which we ventured to express in the memorial above referred to; that it is a matter of great difficulty, (if not of impossibility) to form such a system of survey as will be effectual, in all parts of this country, in preventing fraud and securing a fair, full and equal collection of the revenue. And under the conviction that this great object is not to be attained solely by means of survey, we feel the more anxious that the law should be so altered, as to deprive the fraudulently disposed of the opportunities of evasion, which the lax nature of the existing regulations affords.

We shall not detain your Lordships with a repetition of what has been urged in favour of the measures proposed. They have been recommended by all the Irish distillers, and by all the English, (with the exception of one individual, who, if we are rightly informed, partially objected) and by a great majority of the Scotch. The abolition of low gravities of wash we consider of paramount importance. There exists no reason either with reference to the process or the quality of spirits, which requires the use of a lower gravity than sixty degrees. The latitude at present permitted has been and continues to be taken advantage of to the great injury of the revenue, and that by houses laying claim to respectability and of known skill and experience. It originated chiefly in a wish to adopt the regulations to the ignorance supposed to exist in Ireland and Scotland, but its effect has been to enable the wealthy and experienced to evade the duty, and we earnestly pray your Lordships to put an end to it, by making the lowest gravity sixty instead of thirty degrees.

With regard to the drawback allowed on malt spirits, we deem it unnecessary, after the consideration that has been repeatedly bestowed upon it, to trouble your Lordships with any reasons against it. But we cannot avoid submitting to your Lordships' notice the following extract from the fourth Report of the Select Committee on Public Income and Expenditure 1828; "The Committee are strongly of opinion that bounties in general, and in most cases drawback of duty upon articles used in manufacture, are liable to serious abuse, and are constant sources of fraud, injurious to the fair trader as well as to the revenue. They would advert, in making this observation, to the drawback on malt used in the distilleries, which appears to afford a strong proof of the truth of it."

With

With respect to the oath which it is recommended to impose, we beg to state, that in Cork, and some other places in the South of Ireland, the distillers have again bound themselves, by a voluntary oath, to the full payment of the duty; and no suspicion can be entertained that this oath has not been sacredly kept. And we would humbly submit to your Lordships, that the imperfection of the system, and the fair intention of the parties, are equally proved by the necessity which has twice impelled them to place themselves under an obligation of this nature. An oath imposed by legal authority would not certainly be held less sacred; we respectfully recommend it, under the persuasion that it would be effectual, and simplify and secure the collection of the revenue. But should your Lordships not be disposed to accede to it, we shall feel the greater anxiety for the adoption of the other measures suggested, especially for the abolition of low gravities of wash, it being our sincere conviction, that fixing the minimum at sixty degrees, will tend powerfully to render the revenue independent of ignorance, neglect or corruption, on the part of the officer, and of fraudulent intention on the part of the distiller.

We beg to take this opportunity of alluding to the frauds resulting from the law which authorizes Scotch bere or bigg to be made into malt at an inferior duty. We believe these frauds have been already brought under your Lordships' notice; but one circumstance has come to our knowledge, which we think of sufficient importance to communicate to your Lordships, namely, that Irish barley is conveyed to Scotland, entered as bere or bigg, and made into malt chargeable with the low duty; consequently the Scotch maltster is enabled to bring malt to market, paying less duty by 7*d* per bushel than the Irish maltster pays upon malt made from the same description of barley. Of this fact we entertain no doubt; and we state it under the hope that it will tend to confirm the intention which we have heard your Lordships entertain, of repealing this law during the present session.

We would beg leave further to suggest to your Lordships, the expediency of conferring upon the Board of Excise the power of withdrawing, during pleasure, the license of any distiller, against whom a gross fraud, or perseverance in a course of fraud, should be proved; and also of refusing to license any other person to carry on the business of a distiller in the same premises. We are persuaded a salutary effect would result from a regulation of this nature.

We pray your Lordships to take what we have stated into consideration, and to adopt, without delay, what we have suggested, or such other measures as your Lordships may deem effectual to secure the revenue and enforce its collection; foreseeing the certain ruin of every establishment conducted on fair and honest principles, should fraud remain unchecked, and be suffered to increase, as it threatens to do.

*James Jameson.*

*John Haig.*

Dublin, 4th May 1829.

---

TO THE RIGHT HONOURABLE THE LORDS COMMISSIONERS OF  
HIS MAJESTY'S TREASURY.

WE, the undersigned distillers in the city and county of Cork, beg leave with great respect to solicit the consideration of your Lordships to a few and simple changes which we implore you to cause to be made in the existing laws regulating the manufacture of spirits, and which we feel convinced will as much tend to the improvement of the public revenue, as to the advantage and protection of every fair trader.

1st.—We solicit that you do not allow any gravity of wash lower than sixty degrees.

2d.—That you repeal the drawback now allowed on spirits appearing to be made from malt only.

3d—That you oblige each distiller, and his acting partners, previous to obtaining license, to take an oath not to evade the duty on spirits, nor to allow of evasion.

We shall not burthen your Lordships with the repetition of the reasoning we submitted to you during the last sessions of Parliament, in support of the alterations we then and now seek to have made in the law. We doubt not the importance of the subject, both as regards revenue, and as concerns the existence of a large and important manufacturing trade, has fully impressed on your minds the whole bearing of our reasoning on the case; we however respectfully beg to say, that we have seen a memorial forwarded to your Lordships, under date the 4th instant, from the distillers of Dublin, and as they have gone at some length into the subject, we deem it unnecessary to do more in praying your attention thereto, than to confirm what they state respecting the voluntary agreement among the distillers of the Southern counties (Cork, Limerick and Kerry) of Ireland, with one solitary exception, whereby they have bound themselves by a solemn obligation, on oath, not to send into consumption one single gallon of spirits for which full duty shall not have been paid.

We do, in truth and sincerity, assure your Lordships, that the most important benefit has accrued to the revenue from this agreement, and that we would contemplate to derive from it considerable advantage, were our surrounding and neighbouring competitors in the trade bound by the same obligation. We have for this second year, say till the 10th of next October, joined in this voluntary regulation, in the hope that in due time your Lordships would so far concur with us as to grant our prayer, that this oath be made part of the law. We are now free to avow, that much difficulty will be interposed in effecting a renewal of this agreement, if the oath be not imposed by law; last year we were herein unanimous; we have now among us, as already noticed, one dissentient; and we would apprehend, that the distillers will feel reluctant at again being bound up by any obligation which will give their non-conforming neighbours a certain advantage over them.

We pray your Lordships' consideration of the premises, and that you will be pleased to adopt the needful measures to protect respectable and honestly conducted establishments from the alternatives of inevitable ruin, or a deep implication in a course of fraud.

We have the honour to remain, with great respect,  
Your Lordships' obedient and humble servants,

Cork, 18th May 1829.

---

TO THE RIGHT HONOURABLE THE LORDS COMMISSIONERS OF  
HIS MAJESTY'S TREASURY.

MAY IT PLEASE YOUR LORDSHIPS,

YOUR Lordships having been pleased to refer to us the annexed memorial of the corn distillers of London, complaining of the continued large importation of Scotch spirits, which, as they allege, are sold at a price below that for which such spirits can be made in this country, and suggesting various means for placing the trade in both countries upon a more equal footing, particularly in regard to the modes of charging the duty.

We

We report, that we have given our particular attention to the several points adverted to by the Memorialists, and we beg to submit to your Lordships the following observations :

The principle of the trade in spirits between the two countries, as laid down by the earliest Acts, appears to have been that of a free intercourse ; and soon after the exportation from Scotland to England commenced, the quantity exported increased so rapidly, as to exceed the whole quantity left for consumption in that kingdom. The license system and other restrictive regulations which were subsequently established, had the effect of materially diminishing the exportation, and although the Acts of the 1st & 2d Geo. IV. c. 82, by which the allowance of the duty on malt used in the manufacture of spirits from malt only, and the 4 Geo. IV. c. 94, which authorized the use of small stills, had relieved the trade in Scotland from some of the restraints of former laws, it was not until the passing of the Act 6 Geo. IV. c. 80, that a system of free intercourse, founded upon principles of equality and reciprocal advantage, was established.

Under this Act, which came into operation on the 5th January 1826, the influx of Scotch spirits rapidly increased ; and the trade being thus thrown open to all the distillers in Scotland without restriction, and their spirits permitted for the first time to go into consumption in this country in a plain and unrectified state, the number of gallons imported amounted to 3,300,000, a quantity not only considerably greater than that imported in any previous year, but exceeding the quantity manufactured by the English distillers in the same period.

This excessive importation of spirits, and the low prices at which they are sold, are attributed by the Memorialists to undue advantages enjoyed by the Scotch distillers, arising, as they allege, first, from the imperfect state of the law ; and, secondly, from the defective execution of it.

It is undoubtedly true that Scotch spirits have been sold in the English market for some time past at prices somewhat lower than the prices of English spirits of the same quality. The memorial does not, however, disclose any facts as to the relative cost of production in the two countries, although it is inferred that in England it exceeds 3*s.* 6*d.* per gallon ; neither is reference made to any local or natural advantages which the Scotch distiller may be supposed to possess, either in the value of labour or the cost of the materials which are used in the manufacture of his spirit, to the benefit of which he would be fairly entitled. It appears, however, that in 1822, the price of raw spirits in Scotland was 2*s.* 3*d.* per gallon, whilst in England it varied from 4*s.* 6*d.* to 4*s.* 9*d.* The present prices are as follows :—

English,	-	-	-	3 <i>s.</i> 6½ <i>d.</i>
Scotch -	-	-	-	3 <i>s.</i> 6 <i>d.</i>

omitting in all cases the amount of duty. It is to be observed, that at the former period very little if any competition existed, and the price of the spirit in the market was regulated by a few distillers ; at present it is obvious that every effort has been made by the Scotch distillers to secure their access to this market. That they should, under such circumstances, have persevered in underselling the English distillers, is not in itself, we submit, any indication of imperfection in the law, but rather of a desire to improve, even at any risk, those opportunities of unrestricted intercourse of which they had been so long deprived by the existing regulations, and by the influence which the English distillers were known to have exerted in order to secure to themselves the monopoly of the home market. This monopoly has been broken down, and the English distiller can no longer keep up the prices of the article in the manner that was previously practised.

With these general observations, we shall now proceed to notice the several measures which have been suggested by the Memorialists as necessary to prevent fraud, and to place the distillers of the different portions of the empire upon a footing of equality.

The first suggestion is, that an apparatus should be adopted for securing the worm end of the still, the Memorialists inferring that a portion of the spirit is clandestinely withdrawn without payment of duty.

By the 18th sec. of the Act 6 Geo. IV. c. 80, a power is given of securing the worm end of every entered still by such mechanism and means as the Commissioners of Excise shall direct and provide for that purpose. This power is not, however, to be exercised in case it should appear that the quality of the

spirits produced should thereby be injured; and representations having been made to your Lordships and to this Board by those distillers whose spirits do not undergo the process of rectification, that the application of machinery would render it very difficult, if not altogether impossible, to separate the impure portion of the spirit, as it flows from the still, in sufficient time to prevent it from deteriorating the quality and flavour of the whole produce, we have hitherto abstained from adopting it. Another and a very important reason for suspending the operation of this clause is the tendency of any mechanical contrivance for the prevention of fraud to weaken the other securities which the law has provided for the protection of the revenue. Checks of this description, however ingenious, may be defeated by equal ingenuity; and considering that the application of a safe would subject the distillers, especially those who work upon a small scale, to considerable expense, we should not feel ourselves warranted in recommending the use of it until the insufficiency of protecting the revenue by the present regulations is more clearly established.

**Malt Drawback.**

The second proposal is the repeal of the malt drawback.

The object for which this allowance was granted, and which the Memorialists suggest should be repealed, was to encourage the production, by the legal distiller of spirits, of a better quality, and to which the taste of the people in Scotland was accustomed, and thereby to give every possible effect to the new system as it respected the suppression of illicit distillation. This allowance, as your Lordships are aware, is refunded by the distiller upon all such spirits as are removed to England; and the regulations of the new law effectually guard against imposition in claiming and obtaining the drawback. We do not feel ourselves called upon, on the present occasion, to submit to your Lordships any particular observations, as to the expediency, on general grounds, of withholding or continuing this allowance; but looking at the question as it relates to the English distiller, we are at a loss to discover in what respect this drawback, strictly confined as it is to spirits for the home consumption of Scotland, can operate to his disadvantage. So little value, indeed, appears to have been attached to it by the Scotch distillers working for the English market, that in the year 1826 they solicited, by memorial to your Lordships, a total repeal of the allowance.

**Attenuation.**

With respect to the third suggestion, that a greater extract should be required from the wash in proportion to its attenuation, we beg to observe, that the charge of duty by this mode is grounded upon the supposition that the distiller can produce from every 100 gallons of wash one gallon of proof spirits, in respect of every five degrees attenuated or decreased in gravity by the process of fermentation. This ratio was founded upon experiments carefully conducted; and the results of the different operations of the distillers of the United Kingdom show, that as a general rule, it is sufficiently accurate. Variations arising from the relative degrees of skill with which the operations of different distillers are conducted, will necessarily happen; but it must be recollected that the charge from the attenuation is only a presumptive one; that there are other collateral checks during the process; and, finally, that the duty is levied upon the spirit itself, if found to exceed the estimated produce from any of the previous modes of computing it. In like manner deficiencies of produce below any of the presumptive charges are subject to duty. Admitting therefore the fact, as stated by the Memorialists, that duty has been paid by the Scotch distillers under the presumptive mode of charge upon upwards of 34,000 gallons more than were produced, it is to be observed, that the deficiency in question is taken on the aggregate operations of all the distillers in that country, many of whom, from inferiority of skill and other causes, are unable to produce the required quantity; whilst others, especially those who send their spirits to England, are in the habit of producing, and in some cases of exceeding the regulated proportion. As it applies therefore to the present question, the fact is wholly inconclusive; and if any inference is to be drawn from it, it would seem that the ratio is already too high and not too low, as stated by the Memorialists. That which the Memorialists have attempted to draw from the existence of this deficiency, namely, that an equal quantity of spirits must have been sent into consumption without permit, is utterly groundless, inasmuch as the duty being charged upon the deficiency when ascertained, the sending out the spirits without permit would have been a needless hazard. Under these circumstances, therefore, and considering

sidering that the exaction of a larger produce would operate as a measure of great hardship upon the small distiller, whom it was the object of the law to encourage, we cannot recommend the adoption of the Memorialists' suggestion.

Upon the Memorialists' fourth suggestion of a limitation of the gravity at which-distillers are allowed to work, we have to observe, that the distiller is obliged to declare the particular gravity at which he intends to work, and a presumptive charge of one gallon of proof spirit in respect of every 5° is raised against him accordingly. In England the range is from 50° to 90°, and in Scotland from 30° to 80°. It is supposed that low gravities are favourable to the production of fine spirits, such as are made in Scotland; and as the process of fermentation is more difficult in proportion to the density of the worts, low gravities are favourable to the operations of the less skilful distiller. The average in England is about 60°, in Scotland it is somewhat less than 50°. Little difference is, however, perceptible between the average gravities of the distillers in each country, whose spirits come into competition; certainly not sufficient to require any alteration of the law in this respect, which, as in the former case, affect exclusively the operations of the small trader, without conferring, in our opinion, any corresponding security of importance upon the revenue.

Limitation of the quantity of the Worts.

The Memorialists lastly suggest, that the removal of officers should be more frequent, in order to prevent collusion with distillers under their survey. In the expediency of frequent interchanges we fully concur. A constant change is, in effect, taking place, by the introduction of fresh officers to supply the places of those who retire in the ordinary course of removal from their respective districts; and as those periods vary, it will be seen that at a distillery, to which seldom less than three officers are attached, a constant succession happens, which is well calculated to protect the revenue against the effects of connivance. It may also be observed, that the various stages of a distillery operation are subject to the surveys of different officers, who are in this respect a check upon each other, as well as upon the distiller. Their performances and conduct are also narrowly inspected by the supervisor, and occasionally by the superior officers. Upon the whole, we have no reason whatever to adopt the Memorialists' inference, that the duty is not fairly levied. If indeed the Scotch distiller is enabled to undersell (as they all do) the English distiller by the corrupt aid of the officers, a simultaneous and general collusion throughout all the distilleries is implied, the existence of which is neither to be inferred from any facts or circumstances which we are in possession of, nor from any thing which the Memorialists have stated in this representation.

More frequent removal of officers.

We have only to add, that the importation of Scotch spirits has considerably diminished in the last year, whilst the quantity of English spirits made has much increased in that period. The experience of another year will probably show how much of the excessive importation complained of, and how far the present low prices, have been occasioned by a desire on the part of the Scotch distillers to secure their access to the English market, upon terms perhaps inadequate to indemnify them for the expenses of freight, and the risk of loss in the transit, or are attributable to any and to what other causes.

We are, &c.

G. SEYMOUR.

W. PARISH.

J. C. MORTLOCK.

Excise Office, London, }  
2d April 1828. }

TO THE RIGHT HONOURABLE THE LORDS COMMISSIONERS OF  
HIS MAJESTY'S TREASURY.

MAY IT PLEASE YOUR LORDSHIPS,

THE Corn Distillers of England having in their annexed memorial again solicited your Lordships' attention to the subject of their former applications, and having repeated their statements, that the successful competition of the Scotch distillers in this market is attributable to the imperfect state of the law, and to its defective execution, we have felt it our duty very carefully to

870.

D 4

examine

examine again the grounds upon which these allegations appear to be founded, and we see no reason to alter the opinion which we had previously formed on this subject, and which we submitted to your Lordships at length in our Report of the 2d of April 1828.

In the present memorials we can discover nothing but a general repetition of the former statement, viz. that under the unequal operation of the existing law, and the notoriously corrupt manner in which it is executed in Scotland, the English distilleries must be destroyed by the competition of the traders of the former country in the English market. We may observe in this place, that it would have been more satisfactory, if instead of these broad and general statements, the English distillers had furnished your Lordships with some direct facts in support of their assertions, as the investigation is placed under some disadvantage by the suppression of that specific information upon which the complaints of the Memorialists must be presumed to be founded.

The chief fact from which it is inferred in these memorials that the distillers of the two countries are competing upon unequal terms, seems to be the low price at which the Scotch spirits have been sold in the English market, and which appears to the English distillers to be explicable only on the suppositions which they have brought forward. In our former Report we submitted our reason for believing that the prices at which Scotch spirits are selling in this market were not attributable to the circumstances mentioned by the English distillers, but to other causes, and we endeavoured to show that the suggestions of that body for the amendment of the law were not only not in themselves expedient or necessary, but that the effect of adapting them would be to restrict, if not wholly to annihilate, that system of free intercourse which the legislature had, after mature consideration, and in concurrence with the views of the Parliamentary Commissioners of Revenue Inquiry, deemed it expedient to adopt, and we shall now again advert to this part of the subject before we go into other details, as it is of great importance in forming a correct judgment on the present question.

It is stated that the price at which Scotch spirits are sold in the market, is less than that at which spirits can be made in this country.

The average price of Scotch spirits during the last year was 10*s.* 3*d.* per gallon, including the duty of 7*s.*

The inference, therefore, is, that English spirits exceed 3*s.* 3*d.* per gallon in the manufacture, and it is directly asserted, that Scotch spirits could not be tendered for sale in England, taking the expenses of freight, risk, and loss by evaporation into consideration at that price, unless the Scotch distiller derived certain exclusive and undue advantages arising wholly from fraud. Beyond this inference we have no data furnished by the English distillers by which the actual cost of producing a gallon of spirits can be calculated. But admitting the fact for a moment, that it exceed the above sum of 3*s.* 3*d.* the immediate question will still be, whether the Scotch distiller, upon whom the proper duty is levied, can manufacture his spirits at a price which enables him to incur the additional expense of exporting them to this country, and to obtain at the present prices a reasonable profit upon the transaction.

On this point it appears, and we would particularly draw your Lordships' attention to the fact, that in the year 1822, a period which is selected as being long anterior to the introduction of the system of free intercourse, and particularly with reference to the confirmation which this statement will receive from the Reports of the Parliamentary Commissioners, the price of raw spirits in Scotland was 2*s.* 3*d.* per gallon, exclusive of the duty, which was then double the present rate, and thereby increasing in some degree the cost of production, if the value of the capital be taken into consideration. The price of English spirits about that period appears to have fluctuated from 4*s.* 3*d.* to 3*s.* a gallon, but no just criterion can be formed of the profits or the cost, as no effectual competition existed, the trade being confined to a very few individuals of extensive capital, who fixed and regulated both the supply and prices of the home market. It is also well known, that they were enabled to render the little competition which did exist still more ineffectual, by the payment of large sums to distillers in Scotland who had applied for licenses, in order to exclude them from, and to secure to themselves the monopoly of the whole English market. These facts and circumstances appear to us to be at variance with the

the statements of the English distillers as to the cost of their spirits, which has been distinctly stated to exceed 3*s.* 3*d.* per gallon, at all events they serve to show beyond a doubt, that the Scotch distiller, without the assistance of the malt allowance, which had then no existence, or any other presumable advantages derivable from the new law, could and did, in fact, produce his spirits for sale in Scotland at a price less by 1*s.* per gallon than the present selling price of Scotch spirits in this country, or 9*d.* taking into consideration the difference between the former and present measures, and of the strength at which the spirits were charged; and if an allowance of 3*d.* per gallon be made for the expense for freight, and loss upon the transit, it is equally clear that the exporter would, at the present prices, derive an additional profit of 6*d.* per gallon at least upon his transactions in the English market.

Having thus, as it appears to us, established the fact that the fair trader can afford to maintain his intercourse with the English market at the present prices, we shall shortly advert to those circumstances of a local nature which appear to afford to him an advantage over the English manufacturer, and also to those provisions of the law by which he is alleged to be favoured.

With respect to local advantages; it appears that the price of barley, the principal and most expensive material in the process, is invariably less in the markets of Scotland than in the markets of this country; that fuel is also obtained at a cheaper rate; and assuming that all other circumstances as to the cost of the process are equal (although the difference in rent and the value of labour might fairly be taken into the account, to the further advantage of the Scotch distiller), the differences which we have stated are sufficient to counterbalance any loss arising from inferiority of skill or deficiency of means to conduct the process, if, indeed, any such inferiority exist, which in the case of these distillers, who chiefly supply the English market, we apprehend is by no means the case.

It does not appear to us, therefore, that these inequalities, arising as they do from natural causes, call for adjustment by any countervailing duties or corresponding restraints; all that is necessary is, we submit, that the pressure of the duties should be equal, and that the mode of levying and securing them, should be consistent and adequate in both cases.

The advantages which it is alleged that the Scotch distillers enjoy from the state of the law, are as follows:

- 1*st.*—The malt allowances.
- 2*d.*—The warehousing of spirits without payment of duty.
- 3*d.*—The bond for the payment of the English portion of the duty on the spirits removed to England, which, as it is alleged, gives practically, to the Scotch distiller, a credit in that respect which the English distiller does not enjoy.

#### MALT DRAWBACK.

The object of this allowance, which is at the rate of 1*s.* 2*d.* for every gallon of proof spirits made wholly from malt, was to promote the establishment of legal distillers in the Highlands working from malt, and generally to encourage throughout Scotland the legal manufacture of spirits from malt, to which the taste of the people in all parts of the country was habituated, and which had hitherto been almost exclusively supplied by the illicit distiller. The questions arising out of this part of the subject are,

First, Whether that object is so far accomplished as to render it expedient and safe to discontinue or diminish the allowance at present; and,

Secondly, Whether the allowance in itself, or the abuse of it, operates to the prejudice of the English distiller in his competition with Scotch spirits in this market.

As the second point is more particularly insisted upon by the corn distillers, we shall first advert to it.

Your Lordships are aware that the malt drawback is refunded in respect to all spirits sent to England upon which the allowance has been claimed, and that such spirits, therefore, go into consumption with the whole malt duty of 2*s.* 7*d.*

370.

E

upon

upon them. We do not, therefore, see in what way this allowance gives any advantage to the Scotch distiller in respect to those spirits which he sends to the English market, unless it be contended that from defects in the mode of granting or checking this allowance, he indirectly derives advantages which may enable him to sell his spirits at a lower price.

On this point we would observe, that whatever opportunities may have formerly existed for fraudulently obtaining the allowance in question, the present mode of claiming it is, by the Malt Act of 1827, 7 & 8 Geo. IV. c. 52, subject to various regulations calculated effectually to secure the revenue from imposition. In the first place the duty is now made to attach upon the actual quantity of dry malt made, and the distiller is thereby unable to claim the allowance on the surplus quantity on which the duty is now secured, and which under the old system he was known to be capable of producing beyond that which had been charged with duty; secondly, it is required that all malt for which the allowance can be claimed shall be made by maltsters entered specially for that purpose; that all the malt so made be measured off the kiln and directly locked up, and remain under the charge of the officers until removed to the distillery; and, thirdly, that instead of the usual credits of about five months, which enabled the distillers to receive the malt drawback on the spirits before the duty was in course of payment, the law has provided, that the full amount of duty shall be paid on the malt in the first instance. It may, therefore, fairly be presumed, that every bushel of malt in respect of which the allowance on the spirit is claimed, has been charged with duty. But we would further remark, that in the year ended 10th October last, there were 273 distillers in Scotland, 77 of whom only sent spirits to England, amounting in the aggregate to 2,733,000 gallons. Of this quantity, 1,578,000 gallons, nearly two-thirds of the whole, were exported from twelve distilleries where the distillers work from grain only, and were therefore altogether unaffected by the malt allowance. This fact appears to us conclusive upon the point that the malt allowance has no influence whatever upon the price at which Scotch spirits are sold in the English market, and serves to explain the grounds upon which the large distillers of Scotland, who chiefly work wholly from grain, have concurred with the English distillers in recommending the repeal of the allowance.

With respect to the remainder of the above quantity, it appears to have been manufactured by distillers who work both from grain and malt; but even if we were to admit that the prices of the spirits sold could be indirectly influenced by means of the allowance, it is difficult to understand the reason why the distillers from grain only in Scotland, who, as we have already stated, supply so large a portion of the demand for Scotch spirits in England, should have been backward in seeking to participate in so great an advantage.

Having shown, as we apprehend, that the malt allowance granted to the distillers in Scotland is altogether inoperative in any question affecting the interests of the English distillers, it may be proper, before we leave this part of the subject, to consider, on more general grounds, the expediency of retaining or discontinuing that allowance. We have to state, in the first place, that in the year immediately preceding that in which it was granted, there were in Scotland 106 distillers; in the year ending 10th October 1828, the number amounted to 273; that the number of gallons of spirits charged with duty for home consumption at the former period was about 2,400,000; at the latter 5,400,000; that there are now in the Highlands no less than 116 legal distillers who work from malt; that of the total quantity distilled by them, only 7,200 gallons have been sent into England, the remainder (upwards of 600,000 gallons) being retained for the consumption of the immediate districts, or being permitted into the adjacent ones, in which the illegal trader had before either established a distillery or a market; and that spirits from the Lowlands made from malt, are also finding their way into those parts of the Highlands which had previously been almost wholly supplied from the same illicit sources.

This system of illicit distillation seems indeed so far to be checked, that many persons who were known to have been engaged in it are now selling the duty-paid spirits in the Lowlands as smuggled, and obtaining for it the higher prices, which, from prejudice, that article still produces. These facts, while they prove that

that the evil is progressively abating, show also that the taste for the illicit spirit still continues, and that any favourable opportunity which may present itself will readily be taken advantage of for the revival of that lucrative occupation.

That these beneficial results have been obtained principally by the operation of malt allowance, appears to us to be indisputable. The establishment of legal distilleries in many parts of the country could not have been effected without such an inducement. A market has been opened to land owners for the disposal of their produce, which was formerly precarious and confined to the demands of the illicit distiller. The proprietors are in consequence actively co-operating in the suppression of the illicit traffic, and the legal distiller has succeeded in producing a spirit at a cheaper rate and of the peculiar quality to which the people of the country had been long habituated, and which before could only be supplied by the illicit trader. Under these circumstances it appears to us, that the present is not the proper moment for the repeal of an allowance which, by encouraging the legal production of pure malt spirits on a large scale, has been attended with such beneficial effects, and we apprehend that its cessation would occasion the revival of the former system.

If putting out of view the expediency on this ground of continuing the allowance, the question be viewed merely as matter of expenditure, with reference to the large sums repaid on this head to distillers in apparent diminution of the malt duty, it may be proper to consider what has been in this respect the real annual expense at which the advantages resulting from the malt drawback have been purchased, and which, we apprehend, will be shown by the following calculation.

It appears that on an average of a few years preceding the year 1822, in which the drawback was first granted, the quantity of malt charged with duty annually was 1,322,000 bushels, and in the seven subsequent years, during which the malt drawback has been in operation, the quantity of malt charged with duty in Scotland averages 2,580,260 bushels. Taking therefore the excess quantity in each succeeding year to the present time, and making due allowance for that portion of it consumed by public brewers, it appears that an additional quantity of malt has been brought to charge, the aggregate duty on which amounted in the six years from 1822 inclusive, to £.922,000; the total amount paid for drawback during the same period rather exceeded one million, deducting, therefore, the sum actually received as additional malt duty from the sum actually paid as malt drawback, it will be seen that the expense to the revenue during the six years that the allowance has operated, has been somewhat less than £.80,000. It appears, therefore, that the great object for which it was originally granted, namely, the suppression of illicit distillation in those parts of the country which were particularly infested by it, and the supply of a better and cheaper spirit to the consumer, has been effected at an annual expense of £.13,000 from this source. If, however, the increased quantity of spirits brought to charge be taken into the account, it will readily be seen that the revenue has actually derived considerable profit from the arrangement.

The second presumable advantage enjoyed by the Scotch distillers over the distillers of England, is the power which the law has afforded to the former of warehousing their spirits without payment of duty. The privilege of bonding spirits in Scotland operates undoubtedly as an inducement to persons of limited capital to establish distilleries, and to bring additional capital in aid of agriculture, by which a less precarious market is afforded for grain than that which was necessarily dependent upon the uncertain demands of the illicit distillers. That the Scotch distiller derives benefit from this system is unquestionable; but it is also proper to remark, that the system was first established at the request and for the protection of the English distiller, who complained that the Scotch and Irish traders had opportunities of exporting to this market from their stocks large quantities of spirits which had not paid duty. At present the privilege forms an essential part of the law upon which the distillery system is conducted, and it would be inexpedient and indeed impracticable to withdraw it. We do not, however, think it would be fair to withhold the like privileges

from the English distillers; and we submit, therefore, that it may be proper to place them upon the same footing in this respect, although the disadvantages under which the English distiller may be supposed to labour on this account, are nearly counterbalanced by the extra expenses to which the Scotch spirits intended for the English market are subject in the transit.

The third point upon which it is alleged that the Scotch distillers have peculiar advantages, is the permission afforded to them of giving bond for payment of the English portion of the duty on spirits sent to this country.

In England, the distiller is required to pay the duty upon his spirits within a fortnight after they are charged. Scotch spirits sent to England must pay the Scotch duty of 2*s.* 10*d.* per gallon previously to shipment, and security is given for payment of the remainder (4*s.* 2*d.*) at two months from the date of the bond, or twenty-one days after the arrival of the spirits. The duty however must be paid before they go into consumption. It would be manifestly unjust to compel the Scotch distiller to pay the full English duty previously to shipment, as suggested by the Memorialists, taking into account the length of the voyage and the risk, and the loss by evaporation on the transit; but this suggestion is coupled with a recommendation that the whole English duty should attach and be payable immediately the spirits are made, and as it necessarily involves the proposition (which indeed is more specifically suggested in another part of the present memorial) that spirits manufactured in Scotland for the English market, should be distilled in premises expressly entered for that purpose, and no where else. We think it unnecessary to trouble your Lordships with any observations upon a suggestion, the effect of which would be the revival of the system of monopoly which it was one of the important objects of the new law to abolish.

It now remains to notice those parts of the law which directly or incidentally affect the process of distillation, and which are objected to by the Memorialists as affording further advantages to the Scotch distiller.

The required produce from attenuation ;  
 The limitation of the gravities ;  
 The close safe ; and, lastly,  
 The survey.

As the Memorialists have stated no new argument and no facts whatever in support of their proposition for an amendment of the law in any of these particulars, we have merely reviewed the grounds of our former objections to the adoption of them, and we continue to be decidedly of opinion that as a general rule, the present required produce of one gallon of proof spirits for every five degrees of wash attenuated, is sufficiently accurate for all the purposes of the revenue. The result of recent special surveys in England gives strong reason to believe that the excesses in spirits beyond the produce estimated by the previous processes, and from which the power of producing a larger proportion than the law requires is inferred by the Memorialists, have arisen from means which have been improperly adopted by some of the traders to prevent the officer from ascertaining the actual gravity of their worts; and as your Lordships will doubtless have observed that inferiority of skill in conducting the process on the part of the Scotch distiller is distinctly implied throughout these applications, as a strong presumption that his successful competition in the English market was only to be accomplished by means of fraud, it is obvious that to increase the required produce, would considerably add to the disadvantage of the fair traders in that country, supposing them to be really inferior in skill.

On the subject of the gravities we have to observe, in addition to what we stated in our former Report, that in Scotland and Ireland, distillers are restricted from having in their possession, except in the earliest stages of the process, worts exceeding in gravity by more than three degrees the gravity of the worts intended to be prepared as specified in the notice previously given for that purpose. In England no such restriction exists, and as there is reason to believe that advantage has been taken of this circumstance to introduce worts of  
 a higher

a higher density than specified in the notice, and that the officer has by these and other means, been prevented from taking a correct account of it, we submit that the English distillers should in this respect be placed on the same footing with those of Scotland and Ireland, and that the law should be made uniform upon this point throughout the United Kingdom.

There is also another discrepancy between the distillery laws of England and those of Scotland and Ireland, which it appears to us to be proper to remove. In England, distillers are subject to a charge of duty in respect of the quantity of proof spirits found to be contained in the low wines or spirits of the first distillation, and an allowance of two per cent. is made on such quantity in consideration of the loss arising in the re-distillation. In Scotland and Ireland, distillers are subject to a similar charge of duty; but the allowance for waste instead of two per cent. as in England, is five per cent. This last allowance appears to have been granted before it had been satisfactorily ascertained what abatement was actually necessary; but as two per cent. was found to be adequate, the allowance on passing the English distillery law was restricted to that amount, and we submit that the same rate only should be extended to Ireland and Scotland.

Upon the subject of the Safe, we have no observations to offer in addition to those contained in our former Report.

With respect to the system of survey we desire to assure your Lordships that we have given our most anxious attention to the observations of the Memorialists. If as it is alleged the service is notoriously corrupt, we cannot but regret that no instances of connivance have been stated that immediate means might be taken for securing the revenue and the fair trader from the effects of it. Having already detailed to your Lordships in our former Report the general system of check upon the operations of the distiller, we have only to add that we have directed that the surveys of the superior officers be still more frequent, and have enjoined them to use their utmost vigilance in detecting any abuses or violation of the law, and to report very accurately the state of the several distilleries which they have inspected. In the mean time it may not be unimportant to the subject, as far as the English distillers are concerned, to show the state of the survey over those distillers in Scotland who send spirits to England.

Of the 2,733,000 gallons sent to this market in the last year,

588,000 were sent from 1 distillery, surveyed by 4 officers.						
1,156,000	-	-	6	-	-	3 ditto each.
875,000	-	-	30	-	-	2
45,000	-	-	40	-	-	1

77

If therefore the present price of Scotch spirits be attributed to fraud, it could only have been accomplished by a simultaneous collusion; and as the premises of these seventy-seven distillers are situated in all parts of the country, the allegations of the Memorialists impugn the integrity of every officer in Scotland. This charge we must take leave not only wholly to discredit, but strongly to protest against, in the absence of any fact in support of it.

With respect to the representations from the Irish distillers upon this subject, and especially to those transmitted with Mr. Stewart's letter of the 24th July 1828, (the whole of which are herewith returned) we have only to observe, that in many instances those provisions of the law which are particularly objected to by the English, are stated to be beneficial to the trader and adequate to the security of the revenue. The objections to it are noticed under their proper heads in the preceding statement, and as the only suggestion which is not to be found in the memorial from the English distillers is that of requiring each distiller to take a formal oath that he will not defraud the revenue, it does not appear to us that any additional observations are necessary.

In conclusion, we trust that it will appear to your Lordships that the inequalities of the present law, which are principally insisted upon by the English distillers, have no influence whatever upon the prices at which Scotch spirits are sold in this market; that where its provisions are common to the traders of both countries the suggested alterations would operate wholly to the disadvantage of the distiller of small capital and of inferior skill, without conferring any corresponding security of importance upon the revenue; and that the present and past state of the market, so far from indicating the existence of general fraud on the part of the Scotch distiller, is conclusive upon the important point that the fair trader has been enabled to maintain his intercourse with England upon terms which afford him a reasonable profit. It appears to us on the whole, that this profit is derived from local advantages wholly independent of the law or the administration of it, and with which we are not aware that your Lordships are called upon to interfere by the imposition of any new restrictions.

We are,

Your Lordships most obedient and most humble servants,

(signed) F. H. DOYLE.
